INTRODUCTION
Sarah K. Lippincott and Katherine Skinner

We are delighted to introduce the second edition of the Library Publishing Directory, featuring 124 library publishers from around the world. The volume of entries confirms that research libraries worldwide are making a strategic commitment to providing publishing services, both on and beyond their campuses. Collectively, the Directory entries show the range of emerging library publishing models and the diverse partnerships represented therein—with scholars, university presses, trade publishers, and many other groups in the extended academic publishing field. We hope that this Directory facilitates knowledge sharing and collaboration between library publishers and increases awareness of this expanding field.

Last year’s Directory has been downloaded over a thousand times since its publication by a diverse international audience, demonstrating broad interest in the development of this publishing subfield. The interactive, web-based Directory (http://atom.lib.byu.edu/lpc/) released in the summer of 2014, now provides additional ways to understand the data collected across library publishers. We hope that our 2015 volume is used by libraries and other publishing stakeholders to locate their peers, understand the range of practices underway across the field, and to inspire further action to support the needs of the scholarly communities they support.

As we describe in more detail below, this year’s edition affirms many of the themes that surfaced in the first Directory last year. We find the focus placed by these library publishers on campus-based partnerships with students, faculty, and presses particularly striking. The programs represented in this Directory also indicate that library publishing retains a strong preference for open access publication and an emphasis on providing services and innovations that apply the unique skill sets of librarians.

The Library Publishing Directory is produced by the Library Publishing Coalition (LPC), a growing community of 60+ research libraries that is committed to advancing the field of library publishing. The LPC’s Directory Committee maintains the Directory and ensures that all the print and digital versions are useful, current, and accurate. Holly Mercer (University of Tennessee) chaired this year’s committee and Katherine Purple (Purdue University) coordinated production of the Directory. Committee members Jane Morris (Boston College), Elizabeth Smart (Brigham Young University), Stephanie Davis-Kahl (Illinois Wesleyan University), Beth Turtle (Kansas State University), Shan Sutton (Oregon State University), Linda Friend (Penn State University), Ann Lally (University of Washington), and Joshua Neds-Fox (Wayne State University), contributed significant time and effort—from building and disseminating the library publishing questionnaire to producing the finished product.
The Directory Committee distributed the questionnaire that serves as the basis for this publication to major library e-mail lists and social media channels in July 2014. We primarily targeted libraries in the United States and Canada, but also received numerous submissions from around the world, including Australia, the United Kingdom, South Africa, Sweden, and Germany.

LIBRARY PUBLISHING LANDSCAPE

The entries in this guide highlight the diverse range of activities that fall under the broad label of library publishing. The data reported herein paint a vivid picture of a thriving library publishing environment. While the details vary in each entry, a number of themes emerge across the represented programs.

Above all, the data reflect libraries’ deep commitment to supporting their campus stakeholders. Nearly all of the respondents partner with campus departments or programs (91%) and individual faculty (90%). Sixty-eight percent also work with graduate students and over half partner with undergraduates. Notably, 28% collaborate with a university press, either on or off campus. Over half of respondents also listed at least one non-campus partner, such as scholarly societies, non-profit organizations, library consortia, and research institutes.

The publication counts also reflect a strong focus on the campus community. Three-quarters of respondents publish journals that are edited or led by faculty on their campuses. Libraries published a total of 432 faculty-driven, campus-based journal titles during the period covered by the questionnaire. Nearly all of these titles (97%) are open access (freely available online). Seventy-one percent of respondents published at least one journal of student research (graduate or undergraduate). Libraries published 214 campus-based student-driven journal titles in 2013-2014. Ninety-four percent of these titles are open access.

Slightly over half of respondents also produce journal titles on behalf of off-campus groups. The libraries listed herein published 195 journal titles under contract/MOU for external groups (such as faculty from other institutions, scholarly societies, or research institutes). Journals produced under contract were more likely to be paid/subscription access—only 57% of these titles are open access. These journals are largely peer-reviewed scholarship. In fact, among respondents who publish journals, the majority (55%) reported that all of their journals are peer-reviewed.

While journals remain the most prominent publication form, a full 56% percent of libraries reported that they published at least one monograph in 2013-2014. Another 47% published at least one textbook. Over half of respondents also publish technical/research reports, faculty and/or conference papers and proceedings, ETDs, and undergraduate capstones/honors theses.
Though library publishers favor open access publication, their business models often look very different from those used by other open access publishers. For example, only 10% of responding libraries reported that their journals charge author fees. Instead, library publishing services are predominantly supported by the library's operating budget. Over half (52%) of libraries reported the library's operating budget as their sole source of funding, and 88% of respondents receive at least some of their funding from the library's operating budget. Other sources of funding include the library materials budget, non-library campus funds, grants, and sales revenue.

Library publishing services tend to be compact operations, with responding libraries reporting a range of .15 to 17 FTE (and an average of 1.8 FTE) in professional staff directly supporting publishing activities. Approximately half of these libraries reported that they also employ paraprofessional staff in their publishing programs. Nineteen percent of these libraries reported that they rely on graduate student labor and a quarter employ undergraduate student workers.

Half of respondents reported that their publishing activities are centralized in one library unit, while the remainder reported that services are spread across various units in the library or around campus. Library publishing activities are housed under a range of library units, including Digital Scholarship, Digital Initiatives, Scholarly Communications, and Collections.

Though library publishing often emphasizes lightweight workflows, library publishers provide a broad range of editorial, production, and technical services. The majority of respondents reported that they provide metadata assignment or support (80%), author copyright advisory (78%), digitization (76%), training (75%), hosting supplemental content (65%), analytics (61%), cataloging (58%), and general outreach (53%). Fewer than half offer DOI assignment/allocation of identifiers (45%), ISSN registry (45%), audio/video streaming (44%), marketing (41%), graphic design for print or web (39%), other author advisory (38%), dataset management (34%), and peer review management (25%). Fewer than 25% of respondents provide contract/license preparation, ISBN registry, copy-editing, notification of A&I sources, open URL support, print-on-demand, typesetting, image services, business model development, budget preparation, compiling indexes and/or TOCs, data visualization, and applying for Cataloging in Publication Data.

As a fundamental service, library publishers maintain, support, and in some cases build a publishing platform. Respondents use a variety of open source, commercial, and locally built technologies, including OJS (43%) and bepress (41%), followed by DSpace (29%), locally developed software (23%), WordPress (23%), CONTENTdm (21%), Fedora (15%), and OCS, EPrints, Islandora, Hydra, OMS, Scalar, and DPubS (each with less than 10%). Many libraries employ
multiple platforms and technologies to support different aspects of the publishing process or to accommodate different types of publications. As the library publishers featured here reflect on their future plans, many report that they expect to grow and formalize their services. Expanding and enhancing data management services featured prominently in libraries’ plans for the future, as did adding new journal and monograph titles and introducing new services for authors and editors.

The addition of over a dozen new entries in this year’s Directory confirms the growth and vitality of this field and the ongoing commitment of libraries to support their communities through providing innovative, sustainable publishing services. We look forward to continuing to document the maturation of this field in the coming years.
LIBRARY PUBLISHING COALITION COMMITTEES

The following Committee Members have donated their time and expertise to advancing the Library Publishing Coalition’s mission and producing its most significant resources.

DIRECTORY COMMITTEE

The Directory Committee is charged with maintaining the Library Publishing Directory, ensuring that both the print and online versions of the Directory are useful to the membership, and communicating with the membership to ensure currency, accuracy and value of the information contained in the Directory. The goal of the Directory is to document the current range of library publishing activities (including costs, staffing, and how libraries are financing these ventures); refine justification and positioning for library-based publishing activities; align library activities in this area with university needs and goals; and help additional libraries to envision and develop publishing services programs.

Current Members
Holly Mercer (chair), University of Tennessee

Stephanie Davis-Kahl, Illinois Wesleyan University
Beth Turtle, Kansas State University
Shan Sutton, Oregon State University
Linda Friend, Penn State University
Katherine Purple, Purdue University
Adrian Ho, University of Kentucky
Ann Lally, University of Washington
Joshua Neds-Fox, Wayne State University

PROGRAM COMMITTEE

The Program Committee will determine the suitability of holding an annual conference and bears primary responsibility for planning and implementing the Library Publishing Forum (e.g., inviting keynotes, soliciting panel presentations, selecting and contracting with the venue, promoting the event).

Current Members
Evviva Weinraub (chair), Oregon State University
Allegra Swift, Claremont University Consortium
Sarah Beaubien, Grand Valley State University

Somaly Kim Wu, University of North Carolina, Charlotte
Spencer Keralis, University of North Texas
Vanessa Gabler, University of Pittsburgh

RESEARCH COMMITTEE
The Research Committee develops the research agenda for the LPC and promotes and conducts research relevant to library publishing.

Current Members
Elizabeth Smart, Brigham Young University
Catherine Mitchell, California Digital Library
Isaac Gilman, Pacific University
Dan Lee, University of Arizona
Mary Beth Thomson, University of Kentucky
Charlotte Roh, University of Massachusetts-Amherst
Brad Eden, Valparaiso University
Gail McMillan, Virginia Tech

MEMBERSHIP COMMITTEE
The Membership Committee bears primary responsibility for recruitment, approval, and orientation of new members.

READING AN ENTRY: SOME “HEALTH WARNINGS”

When we published the first *Library Publishing Directory*, we asked readers to bear with the minor inconsistencies that appear across entries. This year, we have again aimed to produce a directory that is readable and cohesive, but it should come as no surprise that community is still distilling shared definitions and terminology and that there is an ongoing need for the LPC to refine our approach to collecting the data that underlies this *Directory*.

Labeling and categorizing the diverse set of “library publishing” activities is no easy feat; nor is setting boundaries around funding streams, staffing, and services that bear specifically on library publishing activities. We have edited each entry sparingly to allow each library room to clarify or explain their responses as they saw fit.

The questionnaire we use to collect data for the *Directory* was distributed to major library e-mail lists and forums in the United States and Canada. Respondents were instructed to base their answers on the last twelve months of their library activity, a period covering roughly July 2013 to July 2014.

In some cases, questions in the questionnaire on which the entries are based still need to be clarified in order to ensure that we collect consistent data. For instance, we noted inconsistencies in the way that institutions report the numbers of publications they produce. The questionnaire instructs respondents to report the number of publications produced or made available within the last twelve months. Some institutions reported the numbers that were made available *for the first time* within the last twelve months while others reported cumulative numbers of publications as of the date they completed the survey. Readers will also notice that this inconsistency led to some blank cells in the tables reporting publication numbers.

Finally, readers will notice the presence of “seals” next to the title of some entries. These acknowledge the support of our Library Publishing Coalition Members and our Founding Institutions, who each provided $5,000 a year for two-years to seed fund the organization. To recognize their exceptional contributions, we include profiles of specific publications that Founding Institutions have nominated. These also give a practical sense of the wide range of types of publications produced.

We look forward to continuing to produce and improve the *Directory* with the input and participation of this vibrant community.

PROGRAM OVERVIEW
Mission statement: Arizona State University Libraries created the ASU Digital Repository to support ASU’s commitment to excellence, access, and impact. The ASU Digital Repository advances the New American University by providing a central place to collect, preserve, and discover the creative and scholarly output from ASU faculty, research partners, staff, and students. Providing free, online access to ASU scholarship benefits our local community, encourages transdisciplinary research, and engages scholars and researchers worldwide, increasing impact globally through the rapid dissemination of knowledge. The ASU Digital Repository improves the visibility of content by exposing it to commercial search engines such as Google, the ASU Libraries’ One Search, as well as the ASU Digital Repository search portal. The ASU Digital Repository helps meet public access policies and archival requirements specified by many federal grants.

PROGRAM OVERVIEW
Mission statement: The Boston College University Libraries’ publishing program showcases and preserves Boston College’s scholarly output in digital form and makes it freely accessible globally. The institutional repository, eScholarship@BC, is a publishing platform for student theses and juried work and for faculty scholarship. Open access journals provide faculty, student groups, and academic centers with a platform and services for production and publication of high-quality scholarship. The Libraries’ publishing program supports the social justice mission of the University and promotes the goals of the University Libraries by providing access to scholarly resources wherever they are needed.

PROGRAM OVERVIEW

Mission/description: Harold B. Lee Library’s primary publishing resources include an institutional repository and digital publishing services for faculty- and student-edited journals. Combined, these resources are called ScholarsArchive. ScholarsArchive is designed to make original scholarly and creative work—such as research, publications, journals, and data—freely and persistently available. The library’s publishing efforts are targeted at supporting broader academic and public discovery and use of university scholarship. ScholarsArchive may also house items of historic interest to the university. The library supports content partners with software support, digitizing, metadata creation, journal management, and free hosting services.

Year publishing activities began: 2001

Organization: centralized library publishing unit/department

Staff in support of publishing activities (FTE): library staff (2); undergraduate students (0.5)

Funding sources (%): library operating budget (98); charge backs (2)

PUBLISHING ACTIVITIES

Media formats: text; images

Disciplinary specialties: religion; natural history of the American West; children’s literature

Top publications: Western North American Naturalist (journal); BYU Studies (journal); Children’s Book and Play Review (journal); Pacific Studies (journal); TESL Reporter (journal)
Percentage of journals that are peer reviewed: 90

Campus partners: campus departments or programs; individual faculty; graduate students; undergraduate students

Other partners: International Society for the Comparative Study of Civilizations (ISCSC); Association of Mormon Counselors and Psychotherapists (AMCAP); Council on East Asian Libraries (CEAL)

Publishing platform(s): CONTENTdm; OJS/OCS/OMP

Digital preservation strategy: Rosetta (moving from beta to full implementation in 2013)

Additional services: analytics; cataloging; metadata; peer review management; digitization; hosting of supplemental content

Plans for expansion/future directions: Areas of future exploration and possible expansion include monograph publishing, print-on-demand, DOI support, hosting streaming media, and data management.

**HIGHLIGHTED PUBLICATION**

The Western North American Naturalist (formerly Great Basin Naturalist) has published peer-reviewed experimental and descriptive research pertaining to the biological natural history of western North America for more than 70 years.

PROGRAM OVERVIEW

Mission statement: The library’s publishing initiatives provide technology, expertise, and promotional support for researchers, students, and staff at Brock University seeking to make their research universally accessible via open access. The library’s current publishing activities include: publishing five scholarly OA journals in partnership with Scholars Portal and the Ontario Council of University Libraries using Open Journal Systems software; managing a $10,000 Open Access Publishing fund to help Brock authors cover the costs of publishing with fully OA journals or monograph publishers; and hosting and disseminating Brock scholarship through our Digital Repository, which collects graduate theses, major research projects, and subject- or department-based research collections.

PROGRAM OVERVIEW
Mission statement: The Claremont Colleges Library publishing program provides centralized access to research and scholarship produced by faculty, students, and librarians. The library publishes quality open access journals and unique digital collections originating from the Claremont Colleges. Scholarship@Claremont is an open access scholarship repository and publishing platform with a set of services to capture, store, index, and provide access to scholarship produced by the Claremont Colleges academic community. It offers worldwide access to the scholarly output from Pomona College, Claremont Graduate University, Scripps College, Claremont McKenna College, Harvey Mudd College, Pitzer College, Keck Graduate Institute, and the Claremont Colleges Library. Undergraduate research figures prominently as do the journals that range from undergraduate conference papers to interdisciplinary and discipline-specific publications with global contribution and access. Scholarship@Claremont brings together the Claremont Colleges’ scholarship into one location to maximize visibility, influence, and benefit for the individual as well as the institutions. The Claremont Colleges Digital Library (CCDL) is an open access repository that provides access to historical and visual resources collections created by and for Claremont Colleges faculty and students to support teaching and research, as well as videotaped lectures and symposia that take place in the library and on the campuses.

Year publishing activities began: 2006 (first journal); 2010 (in earnest)

Organization: centralized library publishing unit/department

Total FTE in support of publishing activities: professional staff (1)

MISSION STATEMENT: The Center for Digital Research and Scholarship (CDRS) serves the digital research and scholarly communications needs of the faculty, students, and staff of Columbia University and its affiliates. Our mission is to increase the utility and impact of research produced at Columbia by creating, adapting, implementing, supporting, and sustaining innovative digital tools and publishing platforms for content delivery, discovery, analysis, data curation, and preservation. In pursuit of that mission, we also engage in extensive outreach, education, and advocacy to ensure that the scholarly work produced at Columbia University has a global reach and accelerates the pace of research across disciplines.

Year publishing activities began: 1997 (Columbia University Libraries); 2007 (CDRS)

Organization: centralized library publishing unit/department

Total FTE in support of publishing activities: professional staff (14.5); graduate students (0.5); undergraduate students (1.25)

**PROGRAM OVERVIEW**

**Mission statement:** Connecticut College seeks to make the products of student and faculty research and campus resources as widely available as possible through its institutional repository. Mandatory electronic submission of student honors theses began in 2011. The faculty overwhelmingly passed an open access policy in 2013, and the library has supported this by retrospectively making faculty research available through the institutional repository.

Program Overview

Mission/description: The Library’s Digital Publishing Program supports faculty publication of original scholarly content in a digital environment. Our digital publications include journals, monographs, and scholarly editions. All content is available online without charge.

Year publishing activities began: 2002

Organization: services are distributed across library units/departments

Staff in support of publishing activities (FTE): library staff (3.75)

Funding sources (%): library operating budget (10); endowment income (10); other (80)

Publishing Activities

Media formats: text; images; audio; video; data; concept maps/modeling maps/visualizations; multimedia/interactive content

Disciplinary specialties: environment; linguistics; electronic or “new” media; Native American history; history of Arctic exploration

Top publications: Elementa (journal); Linguistic Discovery (journal); Journal of E-Media Studies (journal); Occom Circle Project (digital collection); Artistry of the Homeric Simile (monograph)

Percentage of journals that are peer reviewed: 100

Campus partners: campus departments or programs; individual faculty
**Other partners:** University Press of New England; BioOne

**Publishing platform(s):** CONTENTdm; locally developed software; Ambra

**Digital preservation strategy:** DPN; HathiTrust; LOCKSS; Portico; in-house; digital preservation services under discussion

**Additional services:** marketing; outreach; training; analytics; cataloging; metadata; ISSN registry; DOI assignment/allocation of identifiers; open URL support; peer review management; business model development; budget preparation; other author advisory; digitization; audio/video streaming; XML consultation in JATS 1.0 and TEI

**Additional information:** The partnership with the publisher BioOne is enabling us to increase our technological capacity for journal publishing. BioOne is a significant contributor to the staffing for *Elementa*. The partnership with the University Press of New England is enabling us to increase knowledge and capacity for monograph publishing.

**Plans for expansion/future directions:** Publishing more monographs in conjunction with the University Press of New England, further developing technical capacity for journals, increasing the number of digital editions, working with student journals.

---

**HIGHLIGHTED PUBLICATION**

Through *Elementa: Science of the Anthropocene*, we aim to facilitate scientific solutions to the challenges presented by this era of accelerated human impact with timely, technically sound, peer-reviewed articles that address interactions between human and natural systems and behaviors.

ADDITIONAL INFORMATION

Plans for expansion/future directions: ECDS is currently developing a suite of open source publication tools that we plan to release in the upcoming few years. In particular, we are developing a set of Drupal modules that other journals interested in using Drupal as a platform can use as a basis. We also have released an open source application for creating mobile tours, and we are in the process of developing a platform for annotating scholarly texts.
PROGRAM OVERVIEW

Mission statement: FIU’s Institutional Repository is a full-text, online, open access repository and publishing platform for the scholarship and creative output of FIU. The goals of the repository are to serve as a persistent and centralized access point for FIU scholarship and creative works; promote faculty and student research to a global community; preserve the history, growth, and development of FIU. The mission of the Florida International University publishing program is to provide a set of services and tools to host, provide open access to, and preserve research and scholarship created by members of FIU.

PROGRAM OVERVIEW
Mission statement: Open access is an international movement that has the goal of making peer-reviewed published scholarship available free of charge to the public and to the global scholarly community. FSU supports the principle of open access and officially endorsed it in a 2011 Faculty Senate resolution. University Libraries’ Office of Scholarly Communication provides consultations and information about open access, as well as resources like DigiNole Commons, FSU’s institutional repository, and administration of the Open Access Publishing Fund. This work includes support for, resources for, and hosting of scholarly journals.

Year publishing activities began: 2011

Organization: publishing services are administered by the Office of Scholarly Communication, which is part of the Technology and Digital Scholarship Department

Total FTE in support of publishing activities: professional staff (1.75); graduate students (0.5)

[link: scholarworks.gvsu.edu/orpc]
PROGRAM OVERVIEW
Mission statement: We hope to explore (with faculty in the disciplines) alternatives to closed access publishing systems.

Year publishing activities began: 2012

Organization: We're so small (6 librarians, one of whom is also the college archivist) that we wear many hats, including this one. If we had to characterize it in a word, it would be “anarchist.”

Funding sources (%): library materials budget (100)

PUBLISHING ACTIVITIES
Media formats: text; images

Percentage of journals that are peer reviewed: 0

Internal partners: individual faculty

External partners: Oberlin Group; we also kick in some support for an OA LIS journal

Publishing platform(s): PressBooks

Digital preservation strategy: in-house

Additional services: cataloging

ADDITIONAL INFORMATION
Additional information: Because we're so small, and because two of six librarians are on leave without replacements, not much will be happening in the coming academic year other than whatever the Oberlin Group decides to do. We hope
we will do more in coming years. We expect to do more digital humanities projects that will be public in the next few years.

**Plans for expansion/future directions:** We are among Oberlin Group libraries investigating the feasibility of collectively launching or lending significant support to a liberal arts press. So far, we have some research to share that has been quite interesting (available at leverinitiative.wordpress.com). We also are planning to set aside a percentage of our acquisitions budget annually to devote to OA support. At the moment it’s a *very tiny* percentage, but we hope it is a way to be intentional about our commitment to sharing knowledge with the world.

MISSION STATEMENT: The Ames Library publishing program focuses on disseminating excellent student-authored and peer reviewed research, scholarship, and creative works, with an emphasis on providing education and outreach on issues related to publishing, such as open access, author rights, and copyright.

YEAR PUBLISHING ACTIVITIES BEGAN: 2008

ORGANIZATION: centralized library publishing unit/department

TOTAL FTE IN SUPPORT OF PUBLISHING ACTIVITIES: professional staff (1); paraprofessional staff (1); undergraduate students (2)

FUNDING SOURCES (%): library operating budget (25); non-library campus budget (75)

PUBLISHING ACTIVITIES

MEDIA FORMATS: text; images; audio; video

DISCIPLINARY SPECIALTIES: economics; political science; history; multi (conferences, Honors projects)

TOP PUBLICATIONS: Undergraduate Economic Review (journal); Constructing History (journal); Res Publica (journal)

PERCENTAGE OF JOURNALS THAT ARE PEER REVIEWED: 100

INTERNAL PARTNERS: campus departments or programs; individual faculty; undergraduate students

PUBLISHING PLATFORM(S): bepress (Digital Commons)
Digital preservation strategy: in-house; digital preservation services under discussion

Additional services: training; analytics; metadata; peer review management; author copyright advisory; other author advisory; hosting supplemental content; audio/video streaming

ADDITIONAL INFORMATION

Additional information: Regarding our funding model: 25% of the cost of our bepress implementation is covered by the library, while the remaining 75% is generously provided by the Office of the President, Office of the Provost, and Mellon Center for Faculty and Curriculum Development. Faculty advisors for our student journals donate their time.

Plans for expansion/future directions: We continue to seek out ways to position the program to become a publishing outlet for faculty. We are also in talks to develop an open access undergraduate research journal in educational studies.

PROGRAM OVERVIEW
Mission statement: The purpose of Library & Educational Technologies’ publishing program is to provide a central hub for scholarship associated with James Madison University. By providing this space, we enable: the discovery of research; platforms for open access and non-traditional publications; a survey of the local research landscape; and the identification of collaborators for future research. While the program at James Madison University is new, the anticipated publishing scope is broad and includes journals, conference proceedings, ETDs, and select Special Collections materials. It is anticipated that additional material types will be added, including datasets, campus publications, and other campus-produced materials.

**PROGRAM OVERVIEW**

**Mission statement:** The Digital Publishing Unit of the DeWitt Wallace Library supports the creation, preservation, and dissemination of local digital-born scholarship in various formats. Essential to supporting this mission is the continuing exploration of evolving creation, collaboration, and publication tools; encoding methods; and development of staff skills and facility resources. The Unit serves the digital scholarship and electronic publishing needs through the development of digital scholarship projects as well as open access online distribution of journals, articles, and conference proceedings. The Library is committed to playing an active role in changing the landscape of scholarly publishing and supports the ideals of the open access movement.

PROGRAM OVERVIEW
Mission statement: The University Libraries offer a growing suite of publishing services in response to the needs of faculty, students, and staff. The Libraries provide an online platform for journal publishing (OJS) and the opportunity to produce innovative online collections and e-books based in its Digital Repository Service. Through the DRS, the Libraries also provide open access to the university’s electronic theses and dissertations, scholarly research output, and university-produced objects. The Libraries recently took over managing the university’s partnership with the University Press of New England; in early 2015, Northeastern will cease active production of new monographs with UPNE and transition to a distribution-only relationship. An expanded publishing program is currently under development, with year one of a three-year plan beginning in fall 2014.

HIGHLIGHTED PUBLICATION

Annals of Environmental Science publishes original, peer-reviewed research in the environmental sciences, broadly defined. It has been published open-access at Northeastern University since 2007.

www.aes.neu.edu
ADDITIONAL INFORMATION

Additional information: Our one “freemium” journal makes its articles available open access, but also includes sections of material (like curriculum resources) that are only available to members of the society associated with the journal.

Plans for expansion/future directions: The Libraries plan to formalize its current publishing services into a named publishing program in the 2014-2015 academic year. As part of this new program, it will continue the publishing activities already underway, as well as offering a range of new services over a three-year period. In year one (beginning fall 2014), the publishing program will offer expanded journal publishing services through OJS; work with UPNE to create open access digital editions of out-of-print Northeastern University Press titles; and conduct an environmental scan of additional needs for publishing services on campus. We also plan to convene an advisory board.

### ADDITIONAL INFORMATION

**Additional information:** Although an ETD program is considered library publishing for this survey, we did not include ETDs. Our dissertations and theses are submitted by students to the OhioLINK consortial ETD database. Since autumn term 2002, dissertations have been produced by the student in electronic format and submitted the OhioLINK ETD Center. Beginning calendar 2009, all master’s theses have been produced by the student in electronic format and submitted to the OhioLINK ETD Center. We do not host our dissertations and theses separately.

PROGRAM OVERVIEW

Mission statement: Oregon State University Libraries’ publishing activities are primarily focused on the dissemination of scholarship produced by OSU faculty and students. This is achieved largely through the institutional repository ScholarsArchive@OSU, which includes material such as electronic theses and dissertations, agricultural extension reports, conference proceedings, and faculty datasets. OSU Libraries also hosts open access journals that include articles by OSU faculty. The Libraries’ Center for Digital Scholarship and Services digitizes selected out-of-print OSU Press publications, and provides open access to excerpts from Press books and supplementary materials such as maps and datasets. OSU Libraries also collaborates with OSU Press and OSU Extended Campus to publish open textbooks by OSU faculty. Other publishing activities involve the development of online resources that present the unique holdings of OSU Libraries, such as the Oregon Hops and Brewing Archives, the Linus and Ava Helen Pauling Papers, and related archival collections in the History of Science.

Year publishing activities began: 2006

Organization: services are distributed across library units/departments

Total FTE in support of publishing activities: professional staff (3); paraprofessional staff (1)

Funding sources (%): library materials budget (80); endowment income (20)

Internal partners: campus departments or programs; individual faculty; graduate students; undergraduate students

External partners: Transportation Research Forum; International Institute for Fisheries Economics and Trade; Western Dry Kiln Association; Oregon Institute for Natural Resources

University press partners: Oregon State University Press

HIGHLIGHTED PUBLICATION

For more than a century, Oregon State University’s Extension Service and Agricultural Experiment Station publications have covered everything from winemaking techniques to marine economics.
Publishing platform(s): DSpace; Fedora; Hydra; OJS; Wordpress

Digital preservation strategy: LOCKSS; MetaArchive

Additional services: graphic design (print or web); analytics; cataloging; metadata; ISSN registry; DOI assignment/allocation of identifiers; dataset management; author copyright advisory; digitization; image services; data visualization; hosting supplemental content; audio/video streaming

ADDITIONAL INFORMATION

Additional information: It should be noted that while the OSU Press is part of the OSU Libraries organization, the Press’s publishing program, which results in the publication of approximately twenty-five books per year on the Pacific Northwest, has mostly operated independently from the Libraries’ publishing activities. Therefore, the descriptions of “library publishing” have not included the Press’s current print publishing output. The publishing programs of the Libraries and Press, however, are becoming increasingly integrated.

Plans for expansion/future directions: Our plans for the near future focus largely on open textbooks, digital humanities, linking datasets to published articles, and completing the retrospective digitization of all OSU theses and dissertations for dissemination through our institutional repository. The OSU Libraries’ Gray Family Chair for Innovative Library Services is developing a strategic vision for digital publishing with an emphasis on platforms that integrate the publishing activities of the Libraries and Press.

**ADDITIONAL INFORMATION**

**Plans for expansion/future directions:** We plan to significantly expand our monograph publishing activities over the next three to five years; this will include both open access and hybrid access models.
**PROGRAM OVERVIEW**

**Mission statement:** Our mission is to provide consultation and related services for authors and researchers about the range of publishing options available to them, including practical, alternative ways for Penn State faculty and students to publish and disseminate research in many formats. We provide assistance to scholarly journals and societies in disseminating their publications and proceedings electronically using a range of publishing platforms, including our ScholarSphere repository, OJS, OCS, WordPress, and so forth. Doctoral dissertations and master’s theses for most academic programs, as well as the majority of undergraduate honors theses, are submitted digitally and are disseminated through a locally maintained database, and there is an active program of collecting and making student research available. The three primary research journals in the field of Pennsylvania history are part of our digitized collections.

PROGRAM OVERVIEW

Mission statement: The Pepperdine Libraries provide a global gateway to knowledge, serving the diverse and changing needs of our learning community through personalized service at our campus locations and rich computer-based resources. At the academic heart of our educational environment, our libraries are sanctuaries for study, learning, and research, encouraging discovery, contemplation, social discourse, and creative expression. As the information universe continues to evolve, our goal is to remain responsive to users’ needs by providing seamless access to both print and digital resources essential for learning, teaching, and research. The libraries, through Digital Commons@ Pepperdine, offer a wide array of digital publications that are openly available for study, research, and learning.

PROGRAM OVERVIEW

Mission statement: Digital Initiatives and Scholarly Communication services support new models of scholarly communications, copyright services, the showcasing of PSU’s intellectual output via open access repository services, as well as the digitization of unique historical materials. This is achieved largely through the institutional repository, PDXScholar (pdxscholar.library.pdx.edu). Major publishing initiatives include the production of the undergraduate student journals and open textbook publishing. The Library is committed to playing an active role in the changing landscape of scholarly publishing and supports the ideals of the open access movement.

PROGRAM OVERVIEW

Mission statement: Purdue Scholarly Publishing Services focuses on supporting the publication efforts of various centers and departments within the Purdue system. The primary publishing platform used is Purdue e-Pubs (www.purdue.edu/epubs), and the majority of products created are openly accessible, free of charge, to readers. Open access is made possible by the financial support of partners, foundations, and Purdue University Libraries. Major initiatives include the production of the Journal of Purdue Undergraduate Research, the publication of technical reports on behalf of the Joint Transportation Research Program (JTRP), and the project management of HABRI Central, a major bibliographic reference database for researchers in the area of human-animal bond studies, produced in partnership with the Purdue College of Veterinary Medicine. Purdue Scholarly Publishing Services and Purdue University Press, which publishes more formal books and journals, together constitute the publishing division of Purdue Libraries. Our diverse publishing activities are supported by a single group of staff members with assistance from undergraduate and graduate students. By harnessing the skills of both librarians and publishers, and leveraging a common infrastructure, we believe we can better serve the needs of scholars in the digital age and enhance the impact of Purdue scholarship by developing information products aligned with the University’s strengths.

Other: All is dissemination of material produced by the School of Law. The library does not produce material though. Some additional types of material are video recordings of Supreme Court of Texas proceedings. These were filmed by the School of Law, so are produced internally, then disseminated by the law library. We also have one dataset in support of a faculty publication.

PROGRAM OVERVIEW
Mission statement: Digital technologies are prompting significant change and opportunities in scholarly communications, including the roles of commercial publishers, copyright, fair use, rankings of journals, and peer review. This presents exciting opportunities for research libraries to work with faculty to influence and promote positive change in the access to scholarly research, author/faculty rights, decreased costs, and enhanced use of the scholarly corpus through data/textual manipulation and analysis. The Office of Scholarly Communication serves TAMU scholars through the provision of modern, web-based publishing and repository services. We seek to (i) strengthen scholarly communications, open access, and the creation and dissemination of knowledge, (ii) advance access to TAMU scholarship represented by journal articles, conference proceedings, technical reports, research data, educational resources, and digitized special collections through the Texas A&M Digital Repository, and (iii) identify trends and opportunities in scholarly communications and open access. We seek to bring about systemic change on campus through the design of coordinated and innovative programs that rely on an effective partnership with the campus and libraries communities and use an iterative design process that draws from the best practices of program design and organizational change frameworks.

PROGRAM OVERVIEW
Mission statement: Digital Initiatives is a key part of the Library’s strategy to support the evolving needs of faculty and students and to support teaching, research, and learning at UBC. Our goal is to create sustainable, world-class programs and processes that promote digital scholarship, make UBC research and digital collections openly available to the world, and ensure the long-term preservation of UBC’s digital collections. cIRcle is an open access digital repository for published and unpublished material created by the UBC community and its partners. Its aim is to showcase and preserve UBC’s unique intellectual output by making content freely available to anyone, anywhere, via the web.

Organization: services are distributed across library units/departments

PROGRAM OVERVIEW
Mission statement: The CDL Publishing team provides open access digital publication services to the University of California academic community, supports widespread distribution of UC research materials, and fosters new models of scholarly publishing through the development and application of advanced technologies. The CDL’s suite of publication services includes a system-wide digital publications platform as well as tools to support the UC Open Access Policy. All of these services are a part of UC’s broader effort to ensure a sustainable scholarly publishing system in the service of the University’s research and teaching enterprise.

Year publishing activities began: 2002

Organization: At the CDL, the publishing activities are centered in the Access & Publishing group. However, other publishing activities occur across the UC system, some of which use eScholarship, but not all.

Total FTE in support of publishing activities: professional staff (6)

Funding sources (%): library operating budget (100)

PUBLISHING ACTIVITIES
Media formats: text; images; audio; video; data; concept maps, modeling, maps, or other visualizations. We display PDF (rendered as an image), but can accept any format of file as a supplemental file and allow end users to download it.

Disciplinary specialties: eScholarship has no particular domain focus. We support the entire range of academic inquiry, from established disciplines to newly emerging fields.

ADDITIONAL INFORMATION

Additional information: We are currently evaluating our existing publishing activities in order to find efficiencies that will allow us room for experimentation with new platforms, features, genres, modes of publishing, and so forth.
Plans for expansion/future directions: We are currently integrating the eScholarship publishing platform with a publication harvesting system from Symplectic Elements, in order to support UC faculty in their efforts to comply with their Open Access Policy. Harvested and claimed items will have an authorized article made available in eScholarship. In addition, we are exploring new strategies for digital-first monograph publishing and are conducting research with UC-based digital humanists to get a better understanding of their research and publishing needs and how we might support them.
PROGRAM OVERVIEW

Mission statement: The UCF Libraries currently provides publishing support for honors theses, graduate ETDs, and UCF-affiliated or UCF-faculty-edited open access ejournals. Efforts to support broader dissemination of scholarship include enabling access to a wide audience through freely accessible databases and using Open Journal System (OJS) open source publishing software to publish electronic journals from scratch and host electronic journals in Florida OJ. The UCF Libraries collaborates with the Florida Virtual Campus to provide these services.

PROGRAM OVERVIEW
Mission statement: Though the University of Hawaii at Manoa currently does not have a formal library publishing program, our library is involved in providing publishing services through the various collections hosted in our institutional repository, ScholarSpace. We provide the hosting services for numerous department journal publications, conference proceedings, technical reports, department newsletters, as well as open access to some dissertations and theses. The publishing activities are consistent with our mission of acquiring, organizing, preserving, and providing access to information resources vital to the learning, teaching, and research mission of the University of Hawaii at Manoa.

Year publishing activities began: 2007

Organization: services are distributed across campus

PROGRAM OVERVIEW

Mission statement: The University of Kentucky (UK) Libraries launched an institutional repository (UKnowledge: uknowledge.uky.edu) in late 2010 to champion the integration and transformation of scholarly communication within the UK community. The initiative sought to improve students’, faculty members’, and researchers’ access to appropriate resources for maximizing the dissemination of their research and scholarship in an open and digital environment. A crucial component of UKnowledge is providing publishing services to broadly disseminate scholarship created or sponsored by the UK community. We provide a flexible platform to publish a variety of scholarly content and to expand the discoverability of the published works. Using state-of-the-art technologies, we are able to offer campus constituents sought-after services in different stages of the scholarly communication lifecycle to help them thrive and succeed. We also inform them of scholarly communication issues, such as open access, author rights, and the economics of journal publishing. Providing library publishing services is one avenue through which we are making significant contributions to the fulfillment of UK’s mission.

Additional services: graphic design (print or web); marketing; training; analytics; cataloging; metadata; notification of A&I sources; ISSN registry; open URL support; peer review management; contract/license preparation; author copyright advisory; other author advisory; digitization; hosting supplemental content
ADDITIONAL INFORMATION

Plans for expansion/future directions: UK Libraries will continue to strengthen existing library publishing partnerships, bring more campus constituents on board, and build upon our current library publishing services. We will pursue additional opportunities to collaborate with various campus units in support of undergraduate research as we celebrate UK students’ academic achievements by making them visible and accessible worldwide. We will also assist UK-based print journals to create their online presence and extend their reach beyond academia. Through partnerships with UK researchers, we will explore data publishing. Last but not least, we will continue to advocate for open access and open licensing as well as to inform the UK community of new scholarly communication practices, such as alternative metrics, open peer review, and researcher identity management. We look forward to UKnowledge being the primary online publishing avenue for UK-based research and scholarship.

**ADDITIONAL INFORMATION**

**Additional information:** We established an Open Access Publishing Fund in 2013.

**Plans for expansion/future directions:** Launching a Digital Scholarship and Publishing program in fall 2014 that includes publication of electronic journals using OJS, along with exploring options for publishing non-traditional digital publications.
PROGRAM OVERVIEW

Mission statement: ScholarWorks@UMass Amherst, an open access digital repository service, provides a platform for the distribution of content such as ETDs; capstone projects; scholarly output of academic departments, research centers, and institutes; and faculty work. Materials published include online journals, conference proceedings, open education curriculum materials, multimedia objects, and datasets. Services include training and consultation for journal editors, education regarding copyright and licenses, advocacy and consultation for author rights, and data management plans. ScholarWorks provides permanent location and URLs for supplementary content for scholarly publications such as monographs and articles. These value-added services enhance the professional visibility for faculty and researchers, and provide excellent search and retrieval facilities and broader dissemination.

ADDITIONAL INFORMATION

Plans for expansion/future directions: In the future, UMass Amherst Libraries plans to collaborate with the University of Massachusetts Press to provide complete solutions for published scholarly work in both print and electronic formats. Topics to address include provision of joint editorial and production services. Content includes materials from the Open Education Initiative (OEI), which has saved students over $1 million in textbook costs and has resulted in innovative learning materials. A focus area for the upcoming year is outreach and expansion of services to the research centers and institutions on campus, so as to better serve and represent the strengths of UMass Amherst. Longer term goals include capturing undergraduate research, particularly for the Honors College and outstanding departmental projects.

PROGRAM OVERVIEW

Mission statement: eScholarship@UMMS is a digital repository offering worldwide access to the research and scholarly work of the University of Massachusetts Medical School community. The goal is to bring together the University’s scholarly output in order to enhance its visibility and accessibility and serve as a portfolio for institutional successes. We help individual researchers and departments organize and disseminate their research beyond the walls of the Medical School by archiving publications, posters, presentations, and other materials they produce in their scholarly pursuits. Our publishing services—including open access, peer-reviewed electronic journals, student dissertations and theses, and conference proceedings—highlight the works of University of Massachusetts Medical School authors and others.

**ADDITIONAL INFORMATION**

**Additional information:** Michigan Publishing includes both the University of Michigan Library’s library-based publishing operations as well as the activities of the University of Michigan Press, which is an administrative unit of the library under the umbrella of Michigan Publishing. As such, it is difficult to separate the Press’s activities from those of the library, and therefore, while our answers might adhere to the guidelines for this survey, they do not necessarily reflect our organization and its output in an accurate way.

**Plans for expansion/future directions:** In the coming years, we will execute further integration of our library and university press operations and expand our publishing services program targeted to meet the needs of our campus community.
PROGRAM OVERVIEW
Mission statement: The Open Scholarship & Publishing Services Department is a new and growing department that currently consists of two closely cooperating units: The Publishing Services unit provides services and infrastructure that supports the creation, production, and dissemination of the University’s faculty- and instructor-produced digital scholarship. The Copyright Services unit provides education and consultation services on copyright, licensing, and other intellectual property issues for the campus community. The major objectives for the department are to conceptualize, implement, and promote sustainable services for content creation and publishing for scholarly and creative works for the campus community; integrate and anchor copyright services within the new department by maintaining and expanding current education, outreach, and consultation services; and finally, anchoring and operationalizing scholarly communications activities within the department. The establishment of the new department is intended to anchor, sustain, and resource interconnected libraries activities while bringing purposeful intra-connection with other libraries activities and strategic initiatives that intersect with the work of the department.

**PROGRAM OVERVIEW**

**Mission statement:** The UNO Library offers ScholarWorks@UNO as a publishing platform for faculty and student scholarship. Our goal is to provide the tools and support for the broadest possible dissemination of campus research and creative work, thereby fulfilling a key element of the University mission: the promotion of research excellence. In so doing, we provide opportunities for students to engage with scholarly communications issues and take their first steps as scholars in their respective disciplines. Our broad range of publications, which currently include a student-edited, peer-reviewed literary journal, conference proceedings, working papers, technical reports, and student theses and dissertations, engage both our local community and the worldwide audience of readers and scholars. In the future we hope to host even more kinds of scholarly and creative work, including datasets and multimedia content. By combining a dynamic publishing platform with expert support, we can contribute to a more open and innovative scholarly communication system that facilitates discovery, collaboration, and the advancement of knowledge.

PROGRAM OVERVIEW
Mission statement: We support the publication of scholarly journals online and assist journal editors with the management, editorial work, and production of their scholarly journal. The DSL offers journal hosting support services to UNC Charlotte faculty. Our services are built on the Open Journal System (OJS) journal management software that facilitates the publication of online peer-reviewed journals. DSL services include platform software hosting, updates, and copyright consulting.

PROGRAM OVERVIEW

Mission statement: The UNT Libraries provide services to help members of the UNT community disseminate the results of their research. We provide information related to scholarly communication, Scholarly Open Access E-Journal Support, and UNT Scholarly Works. The UNT Libraries Scholarly Publishing Services publishes works of scholarship under the brand Eagle Editions. We also support members of the UNT community in their publishing endeavors through our Editors’ Roundtable and through individual consultations about publishing projects.

Year publishing activities began: 2009

Organization: services are distributed across library units/departments

Total FTE in support of publishing activities: professional staff (1.96); paraprofessional staff (0.06)

Funding sources (%): library operating budget (86); charitable contributions/ Friends of the Library organizations (14)

PROGRAM OVERVIEW
Mission statement: The University of Oklahoma Libraries supports platforms for open access journal and book publishing. We seek publishing partners who: wish to publish open access journals; wish to publish open access books in the history of science; utilize an internationally/nationally recognized editorial board; have the resources and staff to publish in a timely manner on a regular schedule; seek to publish original scholarly content; are selective in accepting quality content for publication via a rigorous peer-review process.

**PROGRAM OVERVIEW**

**Mission statement:** The University Library System, University of Pittsburgh offers a full range of publishing services for a variety of content types, specializing in scholarly journals and subject-based open access repositories. Because we are committed to helping research communities share knowledge and ideas through open and responsible collaboration, we subsidize the costs of electronic publishing and provide incentives to promote open access to scholarly research. We strive to promote scholarly publishing at a very low cost; allow easy collaboration among authors, editors, and reviewers regardless of location; and enhance the visibility, discoverability, and navigation of our publications. We actively develop and employ innovative and sustainable technologies to accelerate knowledge production, measure the impact of our research publications, and demonstrate return on investment. We are seeking partners around the world who share our commitment to open access to scholarly research information. Our skilled staff will help you turn your ideas into reality to produce an online academic journal of the highest quality at very low cost.

PROGRAM OVERVIEW
Mission statement: The USF Tampa Library strives to develop and encourage research collaboration and initiatives throughout all areas of campus. Members of the USF community are encouraged to deposit their research with Scholar Commons. We commit to assisting faculty, staff, and students in all stages of the deposit process, to managing their work to optimize access/readership, and to ensure long-term preservation. Long-term preservation and increasing accessibility will increase citation rates and highlight the research accomplishments of this campus. Scholar Commons will have a direct impact on the University's four strategic goals: student success, research innovation, sound financial management, and creating new partnerships.

PROGRAM OVERVIEW
Mission statement: The University of Tennessee Libraries makes original, scholarly, and specialized works available worldwide. Newfound Press, the University Libraries digital imprint, advances the community of learning by experimenting with effective and open systems of scholarly communication. Drawing on the resources that the university has invested in digital library development, Newfound Press collaborates with authors and researchers to bring new forms of publication to an expanding scholarly universe. UT Libraries provides open access publishing services, copyright education, and services to help scholars meet new data management and sharing requirements. In addition, we create digital collections of regional and global importance to support research and teaching.

PROGRAM OVERVIEW

Mission statement: The Leddy Library supports the dissemination of new scholarship by undergraduates, graduates, faculty, and staff at the University of Windsor in a variety of forms. Through the Scholarship at UWindsor repository, we are able to support the dissemination of theses and dissertations that provide increased visibility to the work of our graduate students. We also use the repository to support conferences run on our campus by helping the organizers manage the submission, workflow, and publication process. As longstanding supporters of Open Journal Systems, the library helps to publish and maintain several journals run from our campus. We have also launched our first open access monograph series, Windsor Studies in Argumentation, with the Open Monograph Press software. Providing support for open access is a central concern in all of our publishing endeavors. We seek to educate our users about the value of open access and to encourage various forms of open access publication.

PROGRAM OVERVIEW
Mission statement: The Jean and Alexander Heard Library fosters emerging modes of open access publishing by providing scholarly, technical, and financial support for the digital dissemination of faculty, student, and staff publications. The library maintains several publishing initiatives through its scholarly communication program. Currently, it publishes four peer-reviewed, open access journals—AmeriQuests, Homiletic, Vanderbilt e-Journal of Luso-Hispanic Studies, and the Vanderbilt Undergraduate Research Journal—using Open Journal Systems software. It also hosts a database of electronic theses and dissertations in cooperation with the Graduate School. Additionally, the library distributes undergraduate capstone projects through its institutional repository.

PROGRAM OVERVIEW

Mission statement: Virginia Tech’s Libraries are putting renewed emphasis on publishing, though we have hosted open access ejournals since 1989 and ETDs since 1996. We began offering Open Journal Systems in 2012 and Open Conference Systems in 2013. We are interested in greatly expanding publishing services to support the products of research and scholarship, including data visualization, interactive “books,” and Open Education Resources. We are open to exploring faculty interests in publishing research and scholarship that is more than paper online, such as e-textbooks with interactive components and multimedia works. All collaborations result in sustainable publications that are included in our preservation strategy with the MetaArchive Cooperative. Like most library services, our publishing support is provided without charge.

PROGRAM OVERVIEW
Mission statement: The mission of the Washington University in St. Louis publishing program is to provide alternatives to traditional publishing avenues and to promote and disseminate original scholarly works of the university community. Publishing is supported through three independent library repositories: Open Scholarship provides a platform for ETDs, student research, and faculty scholarship, while also facilitating the original publication of online journals and monographs for the schools of Arts & Sciences, Engineering, Sam Fox School of Art & Architecture, and the Brown School of Social Work; DigitalCommons@Becker enhances the visibility of scholarly work created through the School of Medicine, including faculty research and graduate capstones; and the Law Repository provides free and open access to the school’s intellectual content, with a focus on scholarly journals.

Year publishing activities began: 2009

Organization: centralized library publishing unit/department

Total FTE in support of publishing activities: professional staff (1.7); graduate students (0.8)

Funding sources (%): library operating budget (80); endowment income (20)

PROGRAM OVERVIEW
Mission statement: ANU E Press, as it was originally known, was established in 2003 to explore and enable new modes of scholarly publishing. Taking advantage of new information and communication technologies to make available the intellectual output of the ANU academic community, ANU E Press was Australia’s first primarily electronic academic publisher. After ten years of production, in early 2014 ANU E Press changed its name to ANU Press to reflect the changes the publication industry had seen since 2003. Now that digital publication has become the norm across publishing, the Press no longer needs to set itself apart as a digital publisher, and so has taken the traditional academic publishing name of ANU Press. The primary focus of ANU Press is the electronic production of scholarly works. All works are also available for purchase through a print-on-demand (POD) service. ANU Press produces fully peer-reviewed research publications and is recognized by DIISRTE as a commercial publisher, enabling ANU Press authors to gain full recognition under the Higher Education Research Data Collection scheme.

Year publishing activities began: 2003

Organization: decentralized and centralized (peer-review process decentralized to Editorial Boards across campus; production process centralized in the Press)

PROGRAM OVERVIEW
Mission statement: The library provides open access-oriented publishing services to researchers, including Goettingen University Press, repositories for theses, and peer-reviewed publications. In addition, a central Open Access Fund has been established, which covers article processing charges and monitors the uptake of gold open access at the University. These service areas are combined with strategic involvement in national and international initiatives, such as the Confederation of Open Access Repositories (COAR) and OpenAIRE, the European-wide open access infrastructure for publications. These institutional activities work in both directions; they are crucial for enhancing local services and vice versa feed experiences and lessons learned into international collaborations.

PROGRAM OVERVIEW
Mission statement: The Monash University Research Repository provides a place for the Monash research community to store and manage digital research data and related publications. The repository aims to promote Monash research by making it discoverable and accessible online for the worldwide research community. The repository contains accepted versions of published works like books, book chapters, journal articles, and conference papers. Non-published manuscripts and grey literature like theses, technical reports, working and discussion papers, and conference posters are collected. Research data holdings, datasets, image collections, audio, and video files are also included in the repository.

Year publishing activities began: 2006

Organization: services are distributed across several campuses

Total FTE in support of publishing activities: professional staff (1.5);
paraprofessional staff (3)

Funding sources (%): library operating budget (100)

PUBLISHING ACTIVITIES
Media formats: text; images; audio; video; data

Disciplinary specialties: poetry; prose; environmental crisis; Geographic Information Systems; environmental data

Top publications: Philosophy Activism Nature (journal); Applied GIS (journal)

Percentage of journals that are peer reviewed: 100
Internal partners: campus departments or programs; graduate students

University press partners: Monash University Publishing

Publishing platform(s): VITAL

Digital preservation strategy: digital preservation services under discussion

Additional services: cataloging; metadata; DOI assignment/allocation of identifiers; hosting supplemental content

ADDITIONAL INFORMATION

Additional information: Aside from publishing ETDs, scholarly publishing at Monash Research Repository is a legacy activity to support some journals whose business model did not fit the requirements of an earlier iteration of Monash University Publishing. There were five titles to begin with but this has reduced to two as some titles folded up or migrated to other institutions or scholarly publishers. Monash University Publishing is a separate entity from the library and focuses on publishing quality monographs for sale.

Plans for expansion/future directions: Planning new software to replace existing repository software to allow easier self-submission of research data as primary focus of the library’s efforts. Publications will be handed back to the university research office, and the new system will integrate with a new CRIS system to allow automated dissemination of publication data. Theses publication will be automated within the Graduate School for the collection of digital-only theses manuscripts and published automatically into the new library system.

PROGRAM OVERVIEW
Mission statement: SUP was founded after a decision made by the Vice Chancellor in December 2012. It is a publicly financed operation with its main goal to provide public access to scientific results in multiple formats, both nationally and internationally. The Press provides access to electronic journals and books free of charge, and to printed books at low prices. We aim to make journals and books affordable, and to give them the widest possible dissemination so that researchers around the world can find and access the information they need without barriers.

**ADDITIONAL INFORMATION**

**Plans for expansion/future directions:** As of autumn 2014, the Stockholm University Library offers a new dissertation support service open to all doctoral students at Stockholm University. The idea is to simplify the publishing process. In conjunction with the electronic posting, the doctoral students may choose to get help with the production, distribution and marketing of their dissertations. We will also have a publishing service for “gray literature,” which will offer a limited support similar to that of the press.

PROGRAM OVERVIEW

Mission/description: The University of Huddersfield Press publishes books, journals, and sound recordings. It provides an outlet for publication for University authors, to encourage new and aspiring authors to publish in their areas of subject expertise, and to raise the profile of the University through the Press publications. The principles governing the University of Huddersfield Press are that: (i) all material published should be of high quality and peer reviewed; (ii) as a general rule, material should be published open access via the University Repository, in order to maximize the potential for dissemination to as wide an audience as possible; publications may also be made available by print-on-demand; and (iii) the Press will operate on a cost-recovery profit-sharing model, with any profits being reinvested into the Press.

Year publishing activities began: 2010

Organization: centralized library publishing unit/department

Staff in support of publishing activities (FTE): professional staff (1); paraprofessional staff (0.5)

Funding sources (%): library operating budget (15); non-library campus budget (55); grants (15); sales revenue (15)

PUBLISHING ACTIVITIES

PROGRAM OVERVIEW
Mission statement: The University of Manchester Library’s publishing program has been developed to support the creation, dissemination, and preservation of knowledge. Our mission is to (i) sustain and enhance the research reputations of individuals and organizations affiliated with the University of Manchester; (ii) enhance the global research community’s ability to access the University of Manchester’s research outputs and Special Collections; (iii) produce high-quality learning objects to support academic and personal development. Current publishing activities cover a range of materials, with an emphasis on open access content: (i) PhD theses and dissertations, technical reports and conference papers are published through the institutional repository, Manchester eScholar; (ii) learning objects are shared via JORUM; (iii) image collections are made available via Luna Insight. Manchester Open Library is an open access imprint, developed in partnership with Manchester University Press and due to launch in late 2014. The initial focus will be on publishing open access journals, although the Library is keen to explore other requirements and opportunities from the University of Manchester and beyond.

Year publishing activities began: 2009

Organization: services are distributed across campus

Total FTE in support of publishing activities: professional staff (2); paraprofessional staff (4)

**ADDITIONAL INFORMATION**

**Plans for expansion/future directions:** The Library is keen to develop new services and enhance existing services with new technologies to continue to meet the needs and expectations of the University of Manchester and the wider research community. Manchester Open Library is our latest venture and marks the beginning of a new partnership with Manchester University Press. Launching in late 2014, the initial focus will be on open access journals.
PROGRAM OVERVIEW

Mission statement: UTS ePRESS is the digital, open access scholarly publishing arm of UTS. We publish high-quality scholarly titles across a wide range of academic disciplines, including governance, history, law, literacy, international studies, society and social justice, and indigenous studies. Focusing on open access digital formats only, UTS ePRESS currently publishes journals, books, and conference proceedings and is the leading publisher of peer-reviewed open access journals in Australasia. UTS ePRESS seeks to publish peer-reviewed, scholarly literature in areas of strategic priority for UTS and beyond, attracting the involvement of leading scholars from around the world. In doing so, our aim is to enhance scholarly publishing by exploring, innovating, and enabling new modes of publication in the digital arena. UTS ePRESS is a not-for-profit publisher. We strongly support the free dissemination of scholarly material and, since our inception, have deepened our commitment to open access publishing, despite the growth of complex and diverse publishing models across the world. Our goal is to unlock publicly funded research and share knowledge that will benefit scholars, researchers, readers, and the public, and to extend its reach and impact by making it openly available and widely accessible to a global audience.

INVITATION TO JOIN

The Library Publishing Coalition’s active network of libraries is committed to enhancing, promoting, and exploring this growing field.

Through its activities, the LPC facilitates relationships, conversations, and collective activities, all of which are promoting a growing community of practice. Our members value the LPC’s role in fostering engagement with like-minded colleagues and the opportunity to join a national conversation around publishing.

North American academic and research libraries and library consortia who have or are considering library publishing programs may apply for membership.

Benefits of membership in the LPC include:

- Voting rights
- Opportunities to serve on committees and working groups
- Community engagement and networking
- Professional development and training
- Access to model documentation
- Access to member-only email announcement and discussion lists
- Special registration rates for LPC events

Visit www.librarypublishing.org for more information.
The Library Publishing Coalition initiative promotes the development of innovative, sustainable publishing services in academic and research libraries to support scholars as they create, advance, and disseminate knowledge. It is supported by financial contributions from over 50 founding and contributing member libraries and through infrastructure services from the Educopia Institute. More information can be found at www.librarypublishing.org.

The second edition of the Library Publishing Directory provides a snapshot of the publishing activities of over 120 academic and research libraries, including information about the number and types of publications they produce, the services they offer authors, how they are staffed and funded, and their future plans. In documenting the breadth and depth of activities in this field, this resource aims to articulate the unique value of library publishing; establish it as a significant and growing community of practice; and to raise its visibility within a number of stakeholder communities, including administrators, funding agencies, other scholarly publishers, librarians, and content creators.

Specifically, this Directory:

- Introduces readers to the growing field of library publishing and helps articulate its unique characteristics as a distinctive “publishing field.”

- Facilitates collaboration among library publishers and other publishing entities, especially the university presses and learned societies that share their values.

- Alerts authors of scholarly content to a range of potential publishing partners dedicated to supporting their experimentation with new forms of scholarly communication and open access business models.

- Enables benchmarking and identification of trends in the field.

The Directory is also available Open Access in several electronic formats through www.librarypublishing.org.
