INTRODUCTION

Melanie Schlosser, Liz Hamilton, Joshua Neds-Fox, Tom Bielavitz, and Alexandra Hoff

The Library Publishing Coalition (LPC) is very pleased to present the fifth annual Library Publishing Directory, the most comprehensive resource that exists on the wide range of publishing activities underway in academic and research libraries worldwide. While many LPC member institutions are represented here, the Directory is intended as a resource about and for the wider community of library publishers. To that end, participation is open to any academic or research library engaged in publishing. In this volume, we provide overviews of the library publishing programs in 125 institutions in the US, Canada, the UK, Australia, Brazil, Germany, Ireland, and Sweden.

This Directory is meant for library publishers, of course, and we hope they will find it to be an invaluable resource. It is also intended to be of use to librarians and administrators looking to build local support for publishing efforts, or to answer questions about how best to scope and support their publishing program. Since library publishing takes place within the larger publishing ecosystem, the information contained here will also be of interest to aggregators, distributors, platform developers, and other types of publishers. Finally, we hope that the Directory will be a useful resource to scholars looking for publishing partners, and to those studying library publishing itself.

The LPC’s Directory Committee produces and maintains the Directory annually as both a print and digital publication. Invitations to contribute to the Directory are issued broadly each summer by the Committee through scholarly communications listservs, social media outlets, and also through direct contact with all institutions that have prepared entries in the past. New respondents take a brief survey to provide structured information about their programs; existing respondents are required to review and update their annual data in order to be included. The Committee then works together to review and edit all entries. The Committee also prepares the Directory data set for analysis and prepares the Directory—in partnership with Purdue University Press—for its print publication.

Liz Hamilton (Northwestern University) chaired the Directory Committee this year, and Alexandra Hoff (Purdue University) coordinated the print production and publication process. Committee members Joshua Neds-Fox (Wayne State University) and Tom Bielavitz (Portland State University) provided oversight, survey refinement, proofreading, and myriad other crucial forms of assistance. Melanie Schlosser (Educopia Institute) and Courtney Vukasinovic (Educopia Institute) provided facilitation and administrative support as needed.
As you can see in the 125 entries that follow, library publishing is often the work of a single individual or a very small team. It is a testament to the skill and dedication of library publishing professionals that these small programs have developed so many creative, innovative, and locally responsive publishing services. We hope that this Directory will connect library publishing programs of all sizes, and that those connections will inspire libraries to work together to address challenges and seize opportunities that are too big for any of us to tackle alone.

LIBRARY PUBLISHING LANDSCAPE 2018

Each year, the Directory Committee mines the Directory data set in order to highlight trends and unique aspects of library publishing. In our fifth year, the trends and tendencies pointed out in previous introductions have started to reveal themselves as enduring characteristics and essential features of the library publishing landscape. We believe this reflects both the growing data set and the maturing of the field itself. This introduction highlights that continuity (“The Song Remains the Same”) and draws out two of those essential features for consideration (“Openness” and “Publishing and Pedagogy”).

THE SONG REMAINS THE SAME

This year’s data is remarkably consistent with what we have seen in past Directories. Most of the numbers are very similar to last year or within range from previous years. Of the two areas where there are noticeable changes—services and digital preservation—one of them is in line with previously noted trends.

Partnerships

Partnerships remain important to library publishing programs, and individual faculty and campus departments are still our most common partners. We continue to see significant numbers of partnerships with graduate and undergraduate students, and the number of university press partnerships continues to rise slowly. The only substantial change from last year was a jump in partnerships with graduate students (from 72% last year to 77% this year).

Publication Types

Publication types remain consistent overall, with small gains in some areas (respondents published 442 faculty-driven journals in 2017, up from 436 in 2016), and small decreases in others (173 publications for external groups, down from 249 in the previous year). Larger jumps tend to be within established ranges (for example, 773 monographs reported in the 2016 Directory, 900 reported last year, and 488 in the current Directory) and can often be explained by a spike in production by a single program. As always, faculty-driven journals, monographs, and student-driven journals make up the bulk of libraries’ publishing output.
Funding and Staffing
Reported staffing levels showed virtually no change from last year—we are still averaging 2.1 professional staff per program, for example. Funding sources also remained consistent in many areas (for example, about the same number of programs are relying in part on sales, licensing, charge-backs, and grants) or fluctuated within established ranges. (For example, in the 2016 Directory, 56% of programs relied entirely on the library’s operations budget; in 2017, the percentage had fallen to 48%; this year, it settled in the middle at 50%.)

Digital Preservation
In one of two noteworthy shifts in the data, we continue to see slight increases in the adoption of digital preservation tools and services. In fact, the increase in adoption of the specific solutions listed is remarkably consistent across the list. This increase, along with the slight decrease in libraries reporting that digital preservation services are currently under discussion (32% this year, down from 35% in the 2017 Directory), suggests that library publishers are making slow but thoughtful progress on digital preservation.

Services
The other area where this year’s data diverges from previous years is in services provided. All of the “other services” (e.g., copyright advice, training, metadata services) are listed by fewer programs than in the past. To take the most extreme example, in 2017, 84% of respondents reported providing digitization services; in 2018, the number has dropped to 69%. Most of the decreases are smaller, but they are across the board. The reason for this drop is unclear. It’s possible that programs are streamlining their services, or that what we are seeing is the emergence of new programs that are smaller or more focused than their more-established colleagues.

OPENNESS
The Library Publishing Coalition’s definition of library publishing includes the following: “Based on core library values, and building on the traditional skills of librarians, it is distinguished from other publishing fields by a preference for Open Access dissemination” (emphasis added). In this year’s introduction, we felt it was worth digging into the numbers to see exactly how open the products of library publishing are, and whether that preference for openness manifests in other ways.

This year, the Directory survey includes a question asking respondents to indicate how strongly their program focuses on open access publishing, from 1 (not at all OA) to 5 (fully OA). Of all respondents this year, 49% indicated that their program’s output is fully open access (5), with another 33% coming in as primarily OA (4), for a total of 82% of represented programs focusing entirely or almost entirely on open access publishing. Very small numbers of programs selected (3)
or (2), and none selected (1). This suggests that open access publishing—while not practiced exclusively or consistently by all programs—is a more-or-less universal feature of library publishing. This is a remarkable point of consistency in an otherwise very diverse landscape.

Another place where the Directory data reveals a preference for openness is in the platforms chosen. Of the 17 software platforms respondents listed as being in use by their programs, 13 are open source. Seventy-one of the programs listed (57%) use at least one open source software platform. The most-used platform on the list, Open Journal Systems, is used by 44% of responding programs, surpassing bepress's proprietary Digital Commons platform (41%). Three of the top four most-used platforms—OJS, DSpace, and WordPress—are open source.

**PUBLISHING AND PEDAGOGY**

One of the ways library publishing programs differ from their counterparts in other parts of the scholarly publishing world is their embeddedness within the teaching mission of the library and their parent organizations. Even university presses, though they may have close ties with their universities in many ways, don't have the kind of multilayered contact with teaching and learning that library publishers do.

Looking at this year’s data, respondents interact with students and teaching activities in multiple ways:

- 77% of programs partner with graduate students, and 62% partner with undergraduates.
- Last year, respondents produced 224 student-driven journals and 34 textbooks.
- 91 programs (almost ¾) work with electronic theses and dissertations (ETDs).
- 24 programs employ graduate students, and 31 employ undergraduates.

The programs represented here also publish scholarship on teaching: four programs published four journals and one monograph on teaching-related topics in 2017. A number of less quantifiable connections to the teaching enterprise also appear in the data, including publishing units housed in a teaching-focused department within the library, publishing-related education being provided by librarians, or a reference to the university’s teaching mission in the library publishing program’s mission statement. Combined, all but one of the 125 programs profiled have at least one connection to teaching and learning. It’s not a stretch to say that support of and engagement with teaching and learning is a defining feature of library publishing.

**HOW TO READ AN ENTRY**

Collecting and synthesizing the information provided by over 100 libraries in an evolving and experimental field like library-based publishing presents numerous challenges. Even in this fifth edition, we are refining our approach to data collection and presentation. We are pleased to present what we believe is the most
accurate and complete Directory to date; but we ask that you continue to bear with minor inconsistencies that appear across entries.

Each of the entries in the Directory undergoes minor editing for style and consistency, but we largely leave it up to libraries to present their publishing programs as they see fit. Labeling and categorizing the diverse set of “library publishing” activities is no easy feat; nor is setting boundaries around funding streams, staffing, and services that bear specifically on library publishing activities. Respondents were instructed to base their answers on the last twelve months of their library activity, a period covering roughly July 2016 to July 2017. In some cases, questions in the survey on which the entries are based still need to be clarified in order to ensure that we collect consistent data. For instance, we continue to note inconsistencies in the way that institutions report the numbers of publications they produce, with some reporting numbers of publications that were made available for the first time within the last twelve months and others reporting cumulative numbers of publications as of the date they completed the survey.

Some survey questions asked for a scaled response. “Describe the degree to which your focus is on Open Access” presented respondents with a scale from 1 (not at all) to 5 (completely). Likewise, “Which best describes your library publishing efforts?” offered values of 1 (pilot) through 5 (established). These numbers should help readers interpret program data.

While we aim to present a full picture of the field, the Directory does not claim to be comprehensive. The questionnaire we use to collect data for the Directory was distributed to major library e-mail lists and forums in the United States and Canada and directly to representatives of all the libraries featured in last year’s edition. As in previous years, the majority of entries come from these regions, though there are a number of excellent programs from around the world represented herein. Respondents were also free to skip questions, and some entries in the Directory are more complete than others.

Finally, readers will notice the presence of “seals” next to the title of some entries. These acknowledge the support of our Library Publishing Coalition Members and our Founding Institutions, who each provided $5,000 a year for two years to seed fund the project that founded the organization. To recognize their exceptional contributions, we include profiles of specific publications that member institutions have nominated. These also give a practical sense of the wide range of types of publications produced. Founding institutions who are not current members are also acknowledged.

We look forward to continuing to produce and improve the Directory with the input and participation of this vibrant community.

**PROGRAM OVERVIEW**

**Mission statement:** In a desire to share the fruit of our academic labor with the world, Asbury Theological Seminary has developed First Fruits Press as an open access press to make academic material available to a global audience. Much of the material is tied to our heritage as a part of the Wesleyan-Holiness Movement and so our publications reflect that tradition. Books, journals, papers, and historic material are freely available for download, while print-on-demand copies are available at the cost of paper and binding. This is part of Asbury Theological Seminary’s institutional mission to provide theological material for the Global Church into the 21st century.

ADDITIONAL INFORMATION
The founder of Asbury Theological Seminary, H. C. Morrison, ran a publishing company called The Pentecostal Publishing Company. He left this company and its works to Asbury Theological Seminary, so this press began as a way to republish rare and hard-to-find material from this tradition. However, it soon became evident that open access provided a great deal of opportunity for other publishing ventures and so we have moved into more and more original works, while still republishing older materials related to our theological tradition.

PROGRAM OVERVIEW
Mission statement: The Boston College Libraries’ publishing program showcases and preserves Boston College's scholarly output in digital form and makes it freely accessible globally. The institutional repository, eScholarship@BC, is a publishing platform for student theses and exceptional student work and for faculty scholarship. We provide the Boston College Dataverse to members of our community who wish to publish their data. Open access journals provide faculty, student groups, and academic centers with a platform and services for production and publication of high-quality scholarship. The Digital Scholarship Group works with faculty and students to explore new methodologies and create open access projects. The Libraries’ publishing program supports the social justice mission of the University and promotes the goals of the Boston College Libraries by providing access to scholarly resources wherever they are needed.

Year publishing activities began: 2006

ADDITIONAL INFORMATION

Plans for expansion/future directions: We plan to increase outreach efforts to capture more research data and scholarly publications. We are working to provide more services to those who publish open access journals with our program; we currently have one new faculty-driven journal in development. We also administer an affordable course materials program that we hope will generate some openly available educational content. We will also continue to develop our digital scholarship services and partnerships.

**PROGRAM OVERVIEW**

**Mission statement:** Harold B. Lee Library’s primary publishing resources include an institutional repository that includes digital publishing services for faculty- and student-edited journals, which is called ScholarsArchive. ScholarsArchive is designed to make original scholarly and creative work—such as research, publications, journals, and data—freely and persistently available. The Library’s publishing efforts are targeted at supporting broader academic and public discovery and use of university scholarship. ScholarsArchive may also house items of historic interest to the University. The Library provides support with software, digitization, metadata creation, journal management, and data management.

PROGRAM OVERVIEW
Mission statement: The Claremont Colleges Library publishing program provides centralized access to research and scholarship produced by faculty, students, and librarians. The Library publishes unique digital collections and scholarship originating from the Claremont Colleges. Scholarship@Claremont is an open access scholarship repository and publishing platform with a set of services to capture, store, index, and provide access to scholarship produced by the Claremont Colleges academic community. It offers worldwide access to the scholarly output from Pomona College, Claremont Graduate University, Scripps College, Claremont McKenna College, Harvey Mudd College, Pitzer College, Keck Graduate Institute, and the Claremont Colleges Library. Undergraduate research figures prominently. Scholarship@Claremont brings together the Claremont Colleges’ scholarship into one location to maximize visibility, influence, and benefit for the individual as well as for the institutions.

Additional information: The partnership with the University Press of New England is enabling us to increase knowledge and capacity for publishing scholarly monographs.

Plans for expansion/future directions: Publishing more works in conjunction with the University Press of New England; further developing technical capacity for journals, monographs, and other types of works; increasing the number of digital editions; and building out our services and technical support for student journal publishing.

HIGHLIGHTED PUBLICATION

These design books—Jewelry Design Books of Jaques and Marcus, 1890 to 1910—contain pen and ink drawings of jewelry with wash and pigment coloration. Each design was custom-made for clients and the designs were later pasted into the volumes. These books are an important source for researching the work of Jaques and Marcus, but also offer inspiration and ideas for other work.

DUQUESNE UNIVERSITY
Gumberg Library

Primary Unit: Digital Scholarship

Primary Contact: Gesina A. Phillips
Digital Scholarship Librarian
412-396-1086
phillipsg@duq.edu

PROGRAM OVERVIEW
Mission statement: Gumberg Library seeks to position itself at the center of
digital publishing activities at Duquesne University. The expertise contained
within the Library related to digital publishing platforms and software, metadata
and discoverability, and copyright benefits those seeking to publish unique
content as well as those interested in providing open access to previously
published materials.

Through its institutional repository, the Library seeks to increase access to
unique content produced by members of the Duquesne community. In addition
to open access publications, the institutional repository enables the dissemination
of other expressions of scholarship such as data and supplemental materials.
Gumberg Library is committed to enabling transparency in research and
broadening access to nontraditional markers of scholarly achievement.

The institutional repository provides a home for student scholarship, which is
then made available worldwide. Gumberg Library has provided access to graduate
student electronic theses and dissertations (ETDs) since 2003. The institutional
repository also houses original student research from on-campus undergraduate
and graduate symposia, and it seeks to collect materials by Duquesne affiliates and
invited speakers at on-campus talks, symposia, and conferences.

Gumberg Library’s publishing activities, while still growing, serve the Duquesne
mission through a commitment to excellence and access to information on a
global scale.

Digital preservation strategy: digital preservation services under discussion

Additional services: marketing; outreach; training; analytics; cataloging; metadata; compiling indexes and/or TOCs; peer review management; author copyright advisory; other author advisory; hosting of supplemental content; ISSN/ISBN registration and DOI assignment not yet offered, but will be offered when and if there is a need
**ADDITIONAL INFORMATION**

Additional information: We have the following goals: migration of all legacy ETDs to Digital Commons; development of a robust digital preservation strategy; recruitment of existing campus publications and conferences for inclusion in the institutional repository; increased recruitment of open access versions of published content, but also increased consciousness of the role of the institutional repository for providing access to data and supplemental materials; inclusion of more undergraduate content.

Plans for expansion/future directions: Use of platform affordances for peer review management.

PROGRAM OVERVIEW
Mission statement: The Ina Dillard Russell Library is committed to recognizing the scholarly achievements of Georgia College by providing publishing opportunities for undergraduate and graduate Georgia College students and faculty. Student and faculty research is published in the institutional repository, The Knowledge Box. Emphasis is on interdisciplinary work aimed at an academic audience. Papers can contribute to the scholarly conversation by reporting critical empirical results in science and mathematics, by developing social science theories, or by exploring descriptive literary and artistic motifs and arguments. The Russell Library is a supporter of open access, a publication model that enables the dissemination of research articles to the community without restriction.

PROGRAM OVERVIEW
Mission statement: We hope to explore (with faculty in the disciplines) alternatives to closed access publishing systems for teaching, learning, and the public good.

Year publishing activities began: 2012

Organization: services are distributed across library units/departments

Total FTE in support of publishing activities: .4

Funding sources (%): library materials budget (100)

Stage of publishing efforts (1–5): At present they are modest and exploratory but we hope to grow our capacity to inform our faculty of publishing alternatives, support their work, and support our students’ capacity to create public-facing research and creative projects.

Open access focus (1–5): 5

Advisory/editorial board: no

PUBLISHING ACTIVITIES
Library publications in 2017: 150

Media formats: text; images
**Top publications:** *Teaching, Scholarship, and Service: An Anthology of Faculty Statements* (book)

**Internal partners:** individual faculty; administrators; grants and foundations office

**Publishing platform(s):** Pressbooks; CONTENTdm; WordPress

**Digital preservation strategy:** CONTENTdm

**Additional services:** cataloging; author copyright advisory; other author advisory; training

**ADDITIONAL INFORMATION**

**Additional information:** In the past year, we have ramped up contributions to our repository, in part because reporting new publications and presentations to our media office, our internal grants program, and the library for IR consideration have all been unified in one submission form, which has greatly raised awareness. We have a staff member spending more time than in the past seeking out and processing contributions. We also have several departments considering or beginning to use our student repository for senior theses. This coming year, one of our six librarians will have her position reformulated to focus on supporting digital scholarship in the classroom, which should broaden our capacity to provide advice and support for making student work public on a variety of platforms. As a teaching institution, student learning is a priority, so our efforts will be trending toward more student engagement with public-facing research projects.

**Plans for expansion/future directions:** Preserving student publications, both print and born-digital, while making them openly accessible. Publishing a local history book with a retired professor. Developing in-house expertise in platforms that can be used in courses to make student projects public. Providing more faculty development for creating digitally inflected courses.

ADDITIONAL INFORMATION

Plans for expansion/future directions: In early 2017, our campus passed an open access policy. We are currently developing enhanced services to support compliance with the policy. We will continue to use Pressbooks to publish eTexts and potentially open educational resources. We plan to migrate to OJS 3 by spring 2018. As a result of the migration, we plan to develop more comprehensive assessment services for our open journals. We will also work toward improving existing infrastructure for data publishing.

MISSION STATEMENT:
Through its publishing activities, KPU Library collects and preserves a wide range of digital works created by, or on behalf of, the University, its faculty, staff, students, and affiliated partners. These materials include journal articles, conference presentations, textbooks and other educational materials, reports, artwork, videos, and much more. By sharing this content freely through the Internet, the university supports open scholarly communication and collaborative research both within our local community and globally. The various publishing tools we offer, such as our IR, Pressbooks, and OJS, preserve this content and make it easy to discover, thereby providing lasting visibility and recognition for scholarship at KPU.

ADDITIONAL INFORMATION
Additional information: KPU Library hired a dedicated Scholarly Communications Librarian last year, and the library is very supportive and enthusiastic for support and growth in this area. Publishing at our library is still very young, but we are excited for the future! Regarding journals, we have two journals on OJS, but at the moment they have no content yet, so I did not add them in the main list of publications.

Plans for expansion/future directions: We are only just getting started with publishing journals, but we have several lined up, both faculty and student driven. We expect to host up to eight journals within a year. We also expect several new textbooks to be published, as well as growth of the IR contents.

PROGRAM OVERVIEW
Mission statement: Northeastern University Library offers a growing suite of digital publishing services. The library-based publishing program provides an online platform for journal publishing (OJS) and the opportunity to produce innovative online collections and e-books based in its digital repository service. Through the DRS, the Libraries also provide open access to the university’s electronic theses and dissertations, scholarly research output, and university-produced objects. The Library also manages the University’s partnership with the University Press of New England, which produced titles under the Northeastern University Press imprint for 10 years and continues to handle reprints. As part of the publishing program, the Library is producing open access editions of select out-of-print NUP titles.

PROGRAM OVERVIEW

Mission statement: Oregon State University Libraries’ publishing activities are primarily focused on the dissemination of scholarship produced by OSU faculty and students. This is achieved through a number of different channels: 1) The institutional repository, ScholarsArchive@OSU, which includes material such as electronic theses and dissertations, agricultural extension reports, conference proceedings, and faculty data sets. 2) Hosted open access journals. OSU Libraries support OJS-hosted journals and have been central in helping new campus-based journals using the editorial management and hosting service Scholastica. 3) The Libraries’ Digital Publishing Initiatives program (DPI) is in the process of digitizing selected out-of-print OSU Press publications and out-of-copyright materials from our archives to include a collection called Reading the Pacific Northwest. 4) We also create and host a number of Press-related projects using the Scalar platform, and provide open access to excerpts from Press books and supplementary materials such as maps and data sets. OSU Libraries also collaborate with OSU Press and OSU Extended Campus to publish open textbooks by OSU faculty. Other publishing activities involve the development of online resources that present the unique holdings of OSU Libraries, such as the Oregon Hops and Brewing Archives, the Linus and Ava Helen Pauling Papers, and related archival collections in the History of Science. We have been using the publishing platform Scalar to publish content largely related to our special collections.

HIGHLIGHTED PUBLICATION

A compilation of selected crafts talks delivered by faculty at the Pacific University MFA program, this anthology is an exciting introduction to some of the most alert and engaged minds in literary writing in the U.S. across many genres. The essays allow readers to see how the authors think about writing and about teaching writing. All author and editor royalties, as well as 50% of the net revenue from the title, are being donated to an MFA student scholarship fund.
**PROGRAM OVERVIEW**

**Mission statement:** The Libraries Open Publishing group, part of the Digital Scholarship and Data Services department in the University Libraries, serves the Penn State community of authors and researchers with in-house publishing options and related consultation services. We have a commitment to open access and complement the journal and monograph publishing services of the Penn State Press, offering practical alternative ways of publishing and disseminating research in many formats using a range of publishing platforms including OJS, OCS, our ScholarSphere repository, WordPress, Drupal, etc. We provide assistance to scholarly journals and societies in disseminating their publications and proceedings electronically, and our list includes the three primary journals for Pennsylvania history. Doctoral dissertations and master's theses for most academic programs, as well as the majority of undergraduate honors theses, are submitted digitally and are disseminated through a locally maintained database, and there is an active program of collecting and making other student research available.

Plans for expansion/future directions: Continuing to build a formal program of tiered publishing services, particularly for research journals, data, conference proceedings, and student-initiated work. We are also concentrating on developing Drupal Biblio for publishing scholarly bibliographies; a major resource, Utopian Literature in English, is the first formal searchable database. PCS has a working relationship with the Penn State Press, which also reports to the Dean of Libraries and Scholarly Communications. We endorse and follow principles of open access to research information and in April 2014 the University Libraries faculty voted to endorse open access publishing and submit their own scholarship to OA publishing venues whenever possible. The University Senate adopted an Open Access Resolution in April 2015.

HIGHLIGHTED PUBLICATION

Trafika Europe is your online literary site for great new writing from Europe in fresh English translation, with our online quarterly digest. It seeks to help renew the role of literature in nudging along the European conversation in culture, introduce new voices, foster collaborations, and create a kind of “community of communities.”

**PROGRAM OVERVIEW**

**Mission statement:** The Pepperdine Libraries provide a global gateway to knowledge, serving the diverse and changing needs of our learning community through personalized service at our campus locations and rich computer-based resources. At the academic heart of our educational environment, our libraries are sanctuaries for study, learning, and research, encouraging discovery, contemplation, social discourse, and creative expression. As the information universe continues to evolve, our goal is to remain responsive to users’ needs by providing seamless access to both print and digital resources essential for learning, teaching, and research. The libraries, through Pepperdine Digital Commons, offer a wide array of digital publications that are openly available for study, research, and learning.

PROGRAM OVERVIEW

Mission statement: A core strategic driver defined in the Queen's University’s Strategic Framework, 2014–2019 is “research prominence.” The Library’s supporting strategic priority for 2014–2015 to 2016–2017 seeks to “broaden the reach of Queen's research with expanded data curation and scholarly communications services, in collaboration with and in support of emerging regional and national initiatives.” Aligned to this and in support of a “balanced academy” that achieves excellence in both research as well as undergraduate and graduate education, the Library provides technology, implementation expertise, advocacy and outreach on research publication and dissemination to researchers, students, and staff seeking to disseminate their research to a global audience via open access. Current publishing activities supported by the Library include:

- hosting ten scholarly open access journals in partnership with Scholars Portal and the Ontario Council of University Libraries using Open Journal Systems software;
- hosting and disseminating Queen's University’s peer-reviewed open access research through our research repository, QSpace, including journal articles, graduate theses, conference papers, working papers, book chapters, and more. The Library also provides advice and support on publication impact metrics and usage as well as guidance on other areas of open access and scholarly publishing such as open monograph publishing, open educational resources, copyright, licensing and negotiating publisher agreements.

PROGRAM OVERVIEW
Mission statement: The CDL Publishing team provides open access digital publication services to the University of California academic community, supports widespread distribution of UC research materials, and fosters new models of scholarly publishing through the development and application of advanced technologies. The CDL’s suite of publication services includes a system-wide digital publications platform as well as tools to support the UC Open Access Policy. All of these services are a part of UC’s broader effort to ensure a sustainable scholarly publishing system in the service of the University’s research and teaching enterprise.

ADDITIONAL INFORMATION

Additional information: The University Press is pivotal in supporting the Library's establishment of a publishing platform. However, by preserving the press's role as the publisher of high-quality, peer-reviewed scholarly monographs, the Library can protect the brand of both the press and the Library publishing program, while allowing them to function in a symbiotic way, sharing valuable resources as part of a larger press-library publishing ecosystem.

Plans for expansion/future directions: The University of Delaware Library hopes to develop into a full-fledged online journal publisher. Should the journal publishing program be successful, the Library will likely move into publishing conference proceedings and non-scholarly books. Unlike with the journal materials, which will mostly be peer-reviewed, these other publications will need not be subject to peer review.

PROGRAM OVERVIEW
Mission statement: Library publishing at the University of Florida emphasizes collaboration. LibraryPress@UF is a new collaborative imprint with UF and the University Press of Florida with a mutual goal of publishing items featuring library collections and material unique to UF. Orange Grove Texts, for example, are open access textbooks prepared by University Press of Florida, hosted by UF Libraries. The UF Open Journal System Services Team is another collaborative effort where librarians, faculty and students publish open access scholarly serials hosted by Florida OJ, the statewide library installation of Public Knowledge Project’s OJS. The IR@UF provides professional preservation of serials in Florida OJ and actively collaborates to make scholarly work accessible, including dissertations, grey literature and published works. The Digital Support Services unit develops, manages, and publishes digital content from curated collections to support academic programs, organizes conversion and ingest capabilities, facilitates awareness of digital technologies and their application to collection and publishing services. The DSS department supports the University of Florida Digital Collections (UFDC). UF Libraries are the technical partner and host for the Digital Library of the Caribbean (dLOC) and the Caribbean Newspaper Digital Library, both international collaboratives. DSS is among the largest digitization facilities in the southeastern United States.

**ADDITIONAL INFORMATION**

**Plans for expansion/future directions:** In the future close collaboration with the University Press for the LibraryPress@UF will continue. The Libraries and the Press joint Mellon Open Book grant for the digitization of and ePub creation for out of print books will continue. The Libraries are extending the new experience with ePubs for the creation of ePub textbooks in collaboration with the University of Havana. Ongoing activities include publication of textbooks, artists books, and experimental digital scholarship, along with integration with courses and academic programs, as with the academic publishing track in the graduate program for the Department of History and academic publishing internships and activities as they relate to the Digital Humanities Graduate Certificate. The LibraryPress@UF will publish additional titles in 2018 including an ARL SPEC Kit on Libraries and Presses. The Libraries will continue to support journal publication with an editors round table; additional journals will be added to Florida OJ. The Libraries will build upon successful work in collaboration and community building, Collaborating with Strangers in Publishing (ufdc.ufl.edu/AA00048553/00001). The institutional repository, IR@UF, will be further promoted as a resource to faculty.

PROGRAM OVERVIEW
Mission statement: The Libraries contribute to the creation and growth of the scholarly and literary record through the publication activities of the University of Georgia Press, The Georgia Review, the Digital Library of Georgia, and the Athenaeum@UGA institutional repository. We will leverage our publishing and digital library programs to explore ways to establish new sustainable modes of scholarly communications that generate worldwide visibility for faculty and student research, the literary arts, and digital scholarship created at UGA. We will collaborate with others on campus and beyond to support open data and open scholarship resulting from the University’s research enterprise. Through these activities, we will contribute to the literary, cultural, and educational advancement in our state, the nation, and the world.

PROGRAM OVERVIEW

Mission statement: The University of Illinois Library’s Scholarly Communication and Publishing unit is an essential part of the Library’s long-standing efforts in offering scholarly preservation, dissemination, and access solutions to faculty and students at the University of Illinois and beyond. In partnership with other campus units, including the iSchool, Office of Undergraduate Research, the Illinois Program for Research in the Humanities, the University of Illinois Press, and others, the Scholarly Communication and Publishing unit develops high-quality scholarly publishing services in addition to its suite of scholarly communications training and consulting services. The unit aims to educate student and faculty researchers on resources for effective scholarly communications and navigate all of the key functions of the publishing process. We are responsible for authors’ rights, permissions, and contracts consultations, institutional repository management, as well as journal, book, and multimodal scholarly publication development and support.

PROGRAM OVERVIEW
Mission statement: The University of Kentucky (UK) Libraries launched an institutional repository (UKnowledge) in late 2010 to champion the integration and transformation of scholarly communication within the UK community. The initiative sought to improve students’, faculty’s, and researchers’ access to appropriate resources for maximizing the dissemination of their research and scholarship in an open and digital environment. A crucial component of UKnowledge is providing publishing services to broadly disseminate scholarship created or sponsored by the UK community. We provide a flexible platform to publish a variety of scholarly content and to expand the discoverability of the published works. Using state-of-the-art technologies, we are able to offer campus constituents sought-after services in different stages of the scholarly communication lifecycle to help them thrive and succeed. We also inform them of scholarly communication issues such as open access, author rights, open licensing, article-level metrics, researcher identity management, and the economics of scholarly publishing. Providing library publishing services is one avenue through which we are making significant contributions to the fulfillment of UK's mission.

**ADDITIONAL INFORMATION**

**Additional information:** Over 1,100 monographs published by the University Press of Kentucky are freely available to the current faculty, students, and staff of the University of Kentucky via UKnowledge.

**Plans for expansion/future directions:** UK Libraries will continue to strengthen existing library publishing partnerships, bring more campus constituents on board, and build upon our current library publishing services. We will pursue additional opportunities to collaborate with various campus units in support of undergraduate research as we celebrate UK students’ academic achievements by making them visible and accessible worldwide. We will also assist UK-based print journals to create their online presence and extend their reach beyond academia. Through partnerships with UK researchers, we will explore data publishing. Last but not least, we will continue to advocate open access and open licensing as well as inform the UK community of new scholarly communication practices such as article-level metrics, open peer review, and researcher identity management. We look forward to UKnowledge being the primary online publishing avenue for UK-based research and scholarship.

PROGRAM OVERVIEW
Mission statement: eScholarship@UMMS is a freely available digital archive and publishing system offering worldwide access to the research and scholarly work of the University of Massachusetts Medical School community. The goal is to bring together the University’s scholarly output in order to enhance its visibility and accessibility and serve as a portfolio for institutional successes. We help individual researchers and departments organize and disseminate their research beyond the walls of the Medical School by archiving publications, posters, presentations and other materials they produce in their scholarly pursuits. Our publishing services—including open access, peer-reviewed electronic journals, student dissertations and theses, and conference proceedings—highlight the works of University of Massachusetts Medical School authors and others.

PROGRAM OVERVIEW
Mission statement: University of Minnesota Libraries Publishing Services is here to support our affiliates’ creation of scholarly publications. We provide consultations about general publishing questions, and we publish a number of journals, books, dynamic scholarly serials, and textbooks through our University of Minnesota Libraries Publishing imprint. Our core principles follow:

- We believe the Libraries serves as a critical, central resource for publishing expertise on campus and our essential services should be offered without charge.
- We support scholars by contributing quality, scholarly works to the public commons through open access publishing.
- We practice transparent production processes in order to promote critical understanding of the publishing landscape’s range of production and economic models.
- We support intellectual freedom by keeping the means of production in the hands of scholars.
- We seek to create partnerships on campus and beyond, to help shape the future of scholarly publishing.
- We support innovative publications and scholarly experimentation grounded in widely used standards and time-proven practices.
- We believe that the scholarly ecosystem works best when creators retain their copyright.
- We leverage replicable and scalable tools and services to support the economic sustainability of common publishing activities on campus.
- We work to decrease the cost of higher education for students through the production and integration of open content into course curriculum.

PROGRAM OVERVIEW
Mission statement: The UNO Library offers ScholarWorks@UNO as a publishing platform for faculty and student scholarship. Our goal is to provide the tools and support for the broadest possible dissemination of campus research and creative work, thereby fulfilling a key element of the University mission: the promotion of research excellence. In so doing, we provide opportunities for students to engage with scholarly communications issues and take their first steps as scholars in their respective disciplines. Our broad range of publications, which currently include a student-edited, peer-reviewed literary journal, conference proceedings, working papers, technical reports, and student theses and dissertations, engage both our local community and the worldwide audience of readers and scholars. In the future we hope to host even more kinds of scholarly and creative work, including datasets and multimedia content. By combining a dynamic publishing platform with expert support, we can contribute to a more open and innovative scholarly communication system that facilitates discovery, collaboration, and the advancement of knowledge.

**HIGHLIGHTED PUBLICATION**

LeMay’s activities in World War II are well-documented, but his personal history is less thoroughly recorded. Throughout the war he wrote hundreds of letters to his wife, Helen, and daughter, Jane. They are published for the first time in this volume, weaved together with meticulously researched narrative essays buttressed by both official and unofficial sources and supplemented with extensive footnotes.

PROGRAM OVERVIEW
Mission statement: The University of Victoria Libraries supports scholarly publishing activities through a variety of activities, providing technology, expertise and promotional support for researchers and students seeking to make their research widely accessible via open access. The Library's current publishing activities include publishing and hosting several open access journals (faculty, students, association/society, and college journals) on the Open Journals Systems software platform, and hosting and disseminating UVic research and publications (e.g., theses, major projects, technical reports, working papers, posters, reports, books) through our institutional repository. The Library also offers publishing support to faculty for the creation of open access books and textbooks, largely funded via external and internal grants.

PROGRAM OVERVIEW

Mission statement: The Digital Collections Center was created to provide quality digital resources from academic libraries to UW faculty, staff and students, citizens of the state, and scholars at-large. Parallel Press promotes the Wisconsin Idea of making the research of the university available to the world at-large and engages in the research and teaching efforts of the university. It publishes chapbooks and books that feature the work of regional poets and authors. These publications are the result of collaborations with the UW campus community and represent an ongoing commitment by the Libraries to scholarly communication as a contribution to the Wisconsin Idea and in support of the outreach mission of the university. The Gender & Women's Studies Librarian's Office publishes three periodicals, plus an online database videography on women, bibliographies, and occasional books.

PROGRAM OVERVIEW
Mission statement: The Jean and Alexander Heard Library fosters emerging modes of open access publishing by providing scholarly, technical, and financial support for the digital dissemination of faculty, student, and staff publications. The library maintains several publishing initiatives through its scholarly communication program. Currently, it publishes four peer-reviewed, open access journals—AmeriQuests, Homiletic, Vanderbilt e-Journal of Luso-Hispanic Studies, and the Vanderbilt Undergraduate Research Journal—using Open Journal Systems software. It also hosts a database of electronic theses and dissertations in cooperation with the Graduate School. Additionally, the library distributes undergraduate capstone projects through its institutional repository.

**PROGRAM OVERVIEW**

**Mission statement:** At Virginia Tech the Libraries provide publishing services to the university and beyond, publishing works solely on the basis of academic merit and interest to our community. The Libraries were among the earliest players in the library publishing arena. In 1989 the Scholarly Communications Project (SCP) was established as a place to experiment with the technology to produce online scholarship in new and developing formats. Since then the Libraries have continued to embrace the increasingly diverse products of research and scholarship that are more than paper online, including e-journals, interactive “books,” open educational resources, and innovative online digital projects. All collaborations result in sustainable publications that are included in our preservation strategy.

PROGRAM OVERVIEW

Mission statement: The mission of the Washington University in St. Louis publishing program is to provide alternatives to traditional publishing avenues and to promote and disseminate original scholarly works of the university community. Publishing is supported through two independent library repositories on the main and medical campuses: Open Scholarship provides a platform for the university community to make their scholarly and creative works available, providing free and open access whenever possible. The Scholarly Publishing department of the University Libraries provides overall administration for the repository, while the Law Library, recently merged with University Libraries, supports and manages publications affiliated with the School of Law. DigitalCommons@Becker enhances the visibility of scholarly work created through the School of Medicine, including faculty research and graduate capstones.

ADDITIONAL INFORMATION

Additional information: The DNURT library was the first in Ukraine that started its library publishing activities. For five years, the library has successfully popularized its experience among university libraries of Ukraine and hosted webinars, trainings, and consultations for librarians. In May 2017, the DNURT library conducted an all-Ukrainian study (“Library Publishing Services at Ukrainian Universities”) in which 112 libraries took part.

Plans for expansion/future directions: Further development of library publishing, improving its reputation and influence. We hope to expand our collections of e-journals and e-conferences. We plan to increase the number of scientific publications and educational resources of scientists and students of DNURT through the expansion of the repository and the promotion of its capabilities. We are going to start publication of monographs on the Open Monograph Press platform.

PROGRAM OVERVIEW

Mission statement: The library provides open access–oriented publishing services to researchers, including Göttingen University Press, repositories for theses and peer-reviewed publications, and innovative publication data management and analysis. In addition, a central open access fund has been established, which covers article processing charges and monitors the uptake of gold open access at the University. These service areas are combined with strategic involvement in national and international initiatives, such as the working group for German-language university presses, the Association of European University Presses (AEUP), Confederation of Open Access Repositories (COAR) and OpenAIRE, the European-wide open access infrastructure for publications. These institutional activities work in both directions: they are crucial for enhancing local services and vice versa feed experiences and lessons learned into international collaborations.

PROGRAM OVERVIEW
Mission statement: Stockholm University Press is a publicly financed operation with its main goal to provide public access to peer reviewed scientific results in multiple formats, both nationally and internationally. In partnership with our authors and series editors, we publish in the humanities, social sciences and the natural sciences. We guarantee that all work we publish meets the highest academic standards by ensuring rigorous peer review is completed. We follow guidelines from the Committee on Publication Ethics (COPE) to ensure ethical editing and publishing. We believe that the control of publishing should be maintained by researchers themselves. All of our content is published under the terms of Creative Commons licenses which ensures that copyright remains with authors and also requires full attribution to accompany all reuse and dissemination. Our recommended license is CC-BY. The Press provides access to electronic journals and books free of charge, and to printed books at cost. We aim to make journals and books affordable, and to give them the widest possible dissemination so that researchers around the world can find and access the information they need without barriers. SUP was founded after a decision made by the Vice Chancellor in December 2012.

ADDITIONAL INFORMATION

Additional information: We have grown our skills pool to ensure that the system does not implode. For every journal or book we have an experienced person with two or three people who are interested in open publishing. Two years ago we had nobody with the skills—now we have 15 staff that will be able to provide advice and guidance for the publication of a book or journal.

Plans for expansion/future directions: We have restructured the library to provide greater support for open publishing. We have expanded the number of staff in the section and have now created one section for repository management and another section for open publishing.
PROGRAM OVERVIEW
Mission statement: The University of Huddersfield Press was established in 2007 and has grown to become a primarily open access publisher of high quality research. Our authors and editorial boards bring international research expertise, a strong orientation to practice, and real-world application to their publications. The Press is keen to support emerging researchers and foster research communities by providing a platform for developing academic areas. We align our activities with the key tenets and identified strategic priorities of the University of Huddersfield Research Strategy. By publishing innovative research as open access we aim to improve access to scholarly work for the benefit of all.

PROGRAM OVERVIEW
Mission statement: The University of Manchester Library’s publishing program has been developed to support the creation, dissemination, and preservation of knowledge. Our mission is to (i) sustain and enhance the research reputations of individuals and organizations affiliated with the University of Manchester; (ii) enhance the global research community’s ability to access the University of Manchester’s research outputs and special collections; (iii) produce high quality learning objects to support academic and personal development. Current publishing activities cover a range of materials, with an emphasis on open access content: (i) PhD theses, technical reports and conference papers are published through the institutional repository, Pure; (ii) learning objects are shared via My Research Essentials and My Learning Essentials webpages; (iii) image collections are made available via Luna Insight. The Library works in partnership with Manchester University Press to support the development of new journals.

d.bangert@unsw.edu.au

PROGRAM OVERVIEW
Mission statement: UNSW Library facilitates the effective dissemination of research by providing infrastructure and guidance in areas related to scholarly communication. The UNSW Library’s journal hosting service supports open access journal publishing initiatives by UNSW researchers. UNSWorks, UNSW’s institutional repository, stores and disseminates a range of research outputs, including ETDs, reports, working papers, conference papers and creative works. A library-supported Faculty of Arts and Social Sciences repository holds several discrete collections, including moving images and audio files. UNSW Library also provides services for data publication and research data management planning. Through these publishing activities, UNSW Library seeks to enable access to scholarly literature and maximise the impact of research produced at UNSW.

PROGRAM OVERVIEW
Mission statement: ORDA (Online Research Data) is the hub for managing and publishing research data, code, conference papers, posters, presentations, reports, papers, and much more at the University of Sheffield. ORDA helps researchers to share research outputs that are not published elsewhere, making their research more discoverable. Researchers can get credit for all published items with a citable, trackable DOI and fulfill funder and publisher open data requirements.

Year publishing activities began: 2015

Organization: Dataset ‘publishing’ is one of a series of responsibility of wider research support provided by the Research Services Unit. The University of Sheffield Library is also a major stakeholder in White Rose University Press which it shares with the Universities of Leeds and York.

Stage of publishing efforts (1–5): 4

Open access focus (1–5): 5

Advisory/editorial board: no

PUBLISHING ACTIVITIES
Library publications in 2017: technical/research reports (10); faculty conference papers and proceedings (89); databases (74); faculty conference presentations and posters (11); metadata records (3)

Library-administered university press publications in 2017: journals produced under contract/MOU for external groups (2)

Media formats: text; images; audio; video; data
Top publications: United States Commutes and Megaregions data for DIS (dataset); European map of Implicit Racial Bias (map); Computer, Speech and Language—Experiment results for paper “Acoustic Adaptation to Dynamic Background Conditions with Asynchronous Transformations” (dataset)

Internal partners: campus departments or programs; individual faculty; graduate students

University press partners: White Rose University Press

Publishing platform(s): figshare

Digital preservation strategy: Rosetta

Additional services: marketing; outreach; training; analytics; metadata; DOI assignment/allocation of identifiers; dataset management

ADDITIONAL INFORMATION
Additional information: Alongside the initial publishing of datasets, we are developing methods and processes for their long-term preservation led by our Special Collections and Digital Preservation teams.

Plans for expansion/future directions: We will support the expansion and development of our collaborative Press—White Rose University Press (governed in partnership with the Universities of Leeds and York). We are also interested in and facilitating the publishing of undergraduate research and postgraduate research that falls short of the peer review process and is currently published ad hoc in departments, if at all. We will continue to focus energy on our data repository as part of our overarching support for research data management. The formal direction of the future strategy with regards to library publishing will be clarified in the new Library Content Strategy due 2017–2018.

PROGRAM OVERVIEW
Mission statement: Publishing and Data Services at the University of Sydney Library support the many ways that academics want to communicate the results of their research. We offer publishing platforms that support open journals and provide open access to digital materials, both text and multimedia. Sydney Open Journals is a fully featured journal publishing platform, offering editorial workflows from submission and selection, through peer review and feedback, to publication and promotion. The Sydney eScholarship Repository can store your technical reports, datasets, and conference papers, as well as audio, video, and other multimedia material. All repository materials are searchable via Google Scholar, maximising access to your content. Other solutions, including digitisation, data visualisation and research data management are also available.

ADDITIONAL INFORMATION
Additional information: We are exploring different ways we can support scholarly communication, from traditional university press to experimental and open publishing activities.

Plans for expansion/future directions: Better support of journals, including DOIs and marketing.
Program Overview

Mission statement: UTS ePRESS is the digital, open access scholarly publishing arm of UTS. We publish high quality scholarly titles across a wide range of academic disciplines, including governance, history, law, literacy, international studies, society and social justice and indigenous studies. Focusing on open access digital formats only, UTS ePRESS currently publishes journals, books and conference proceedings and is the leading publisher of peer reviewed open access journals in Australasia. UTS ePRESS seeks to publish peer reviewed, scholarly literature in areas of strategic priority for UTS and beyond, attracting the involvement of leading scholars from around the world. In doing so, our aim is to enhance scholarly publishing by exploring, innovating and enabling new modes of publication in the digital arena. UTS ePRESS is a not-for-profit publisher. We strongly support the free dissemination of scholarly material and, since our inception, have deepened our commitment to open access publishing, despite the growth of complex and diverse publishing models across the world. Our goal is to unlock publicly funded research and share knowledge that will benefit scholars, researchers, readers and the public, and to extend its reach and impact by making it openly available and widely accessible to a global audience.

INVITATION TO JOIN

The LPC promotes collaboration, knowledge sharing, and networking among library publishers, and between libraries and other publishers, by supporting an evolving, distributed range of publishing practices. We welcome membership applications from academic and research libraries from around the world.

ENGAGE WITH OUR INTERNATIONAL COMMUNITY OF PRACTICE

- Connect with a diverse community of members. From small liberal arts colleges to large research universities, the LPC connects libraries with diverse profiles, interests, and areas of expertise.
- Access the members-only mailing list. Stay up to date with the latest from the LPC and the library publishing community.
- Benefit from special registration rates to LPC events. Attend our popular Library Publishing Forum at a discounted rate.

JUMP-START OR ENHANCE YOUR LIBRARY PUBLISHING INITIATIVES

- Access our shared documentation library. Consult resources created by your colleagues: everything from checklists for starting new journals to model MOUs.
- Participate in webinars with leading experts and vendors. Stay up to date with the latest in the theory and practice of library publishing with our regular webinar series.
- Browse our job board. Consult our archive of job descriptions for an up-to-date look at available jobs, or to inform the development of new positions at your institution.

LEAD CHANGE IN SCHOLARLY COMMUNICATIONS AND PUBLISHING

- Gain voting rights in the Coalition. Ensure that your voice is heard in planning future directions and activities.
- Participate in national and international conversations. The LPC represents the interests of our community within a growing network of university presses, scholarly publishers, vendors, and professional associations.
- Serve on committees and task forces. Contribute directly to the advancement of the field by joining the dedicated group of volunteers who keep the LPC moving.
