A version of the Directory will be openly available online. For questions or assistance, please e-mail [contact@librarypublishing.org](mailto:contact@librarypublishing.org).

Step 1 of 8 - Guidelines

12%

## Guidelines

Please follow these guidelines when completing the questionnaire:

1. Do not include any information that you do not want to share with others.
2. If a university press reports to your library, do not include its activities in your answers unless specified.
3. Base your answers on the following definition of library publishing.

Library publishing services are defined here as:

*...the set of activities led by college and university libraries to support the creation, dissemination, and curation of scholarly, creative, and/or educational works.*

*Generally, library publishing requires a production process, presents original work not previously made available, and applies a level of certification to the content published, whether through peer review or extension of the institutional brand.*

*Based on core library values and building on the traditional skills of librarians, it is distinguished from other publishing fields by a preference for Open Access dissemination and a willingness to embrace informal and experimental forms of scholarly communication and to challenge the status quo.*

**For example**, an institutional repository containing only previously published materials, or digitization of previously published materials, would NOT be counted as library publishing for the purposes of this questionnaire.

**For example**, an ETD program, production and/or hosting of journals, and hosting of original datasets WOULD be considered library publishing for the purposes of this questionnaire.

Based on this definition, does your library currently provide library publishing services? \*
