# Library Publishing Directory Questionnaire

Complete this questionnaire by **September 14, 2020** to be considered for inclusion in the 2021 Library Publishing Directory, published by the Library Publishing Coalition. A version of the Directory will be openly available online. The questionnaire takes between 30 and 45 minutes to complete. You can save your progress and return later, but we recommend [previewing the questions](#) before you begin. If your library has had an entry in a previous edition of the Directory, you should have received an email with instructions on how to update it. Email [contact@librarypublishing.org](mailto:contact@librarypublishing.org) with questions.

Step 1 of 9 - Guidelines

11%

## Guidelines

### Responses to this survey will be used to create:

1. The Library Publishing Directory (maintained by the Library Publishing Coalition)
2. A database of library publishing initiatives (maintained by IFLA Library Publishing Special Interest Group)

### Information collected includes:

- General information about the library publishing initiative and sponsoring institution
- Contact information for a program representative
- Information about staffing and organization of the program
- Publication types and numbers
- Information on platforms used, media types published, services provided, and preservation services

### Please follow these guidelines when completing the questionnaire:

1. Do not include any information that you do not want to share with others.
2. If a university press reports to your library, do not include its activities in your answers unless specified.
3. Responses in English are strongly preferred; we may not be able to include responses in other languages.
4. Base your answers on the following definition of library publishing:

### Library publishing services are defined here as:

*...the set of activities led by academic and research libraries and library consortia to support the creation, dissemination, and curation of scholarly, creative, and/or educational works.*

*Generally, library publishing requires a production process, presents original work not previously made available, and applies a level of certification to the content published, whether through peer review or extension of the institutional brand.*

*Based on core library values and building on the traditional skills of librarians, it is distinguished from other publishing fields by a preference for Open Access dissemination and a willingness to embrace informal and experimental forms of scholarly communication and to challenge the status quo.*

**For example**, an institutional repository containing only previously published materials, or digitization of previously published materials, would NOT be counted as library publishing for the purposes of this questionnaire.

**For example**, an ETD (electronic theses and dissertations) program, production and/or hosting of journals, and hosting of original datasets WOULD be considered library publishing for the purposes of this questionnaire.
